

New **APPROVED** HKUST program!

BSc in Environmental Management and Technology (EVMT)
(JUPAS Program Code: 5036)

We have much pleasure to announce that the Division of Environment of the Hong Kong University of Science and Technology will introduce a new BSc Program in Environmental Management and Technology (EVMT) in the 2010 academic year.

The **BSc in Environmental Management and Technology (EVMT) program** offers students an environmental degree targeting the corporate job market for environment, energy and sustainability. This specially designed program will build strong skills in environment, management and soft skills through unique courses and a rich co-curricular program. This unique and exciting program will prepare students to meet the growing demand for environmentally related positions in multi-national corporations, government, and non-governmental organizations.

Students who are interested to learn more about the program are most welcome to come to the Inaugural Ceremony and Lecture for the Division of Environment followed by the Information Session for the EVMT Program to be held on 7 January 2010 (Thursday).
