Programme Full Name	BSc Computational Finance and Financial Technology (Streams: Computational Finance / Financial Technology) 理學士(計算金融及金融科技) (專修：計算金融 / 金融科技)
Programme Short Name	BScCFFT
Short Description	**Why BSc Computational Finance and Financial Technology?** The BSc Computational Finance and Financial Technology major has two streams, namely (1) Computational Finance Stream and (2) Financial Technology Stream. Computational Finance stream is an interdisciplinary stream offering a comprehensive curriculum that covers state-of-the-art training in finance, mathematics, statistics and computer programming. The integrated application of these four areas is in great demand by today's financial markets. Financial Technology stream gives students an interdisciplinary education in business, information technology, and innovation by training them in mathematics, statistics, programming, information systems, and finance. The FinTech core courses include blockchain, big data, cybersecurity, regulatory technology (RegTech), Python programming, machine learning, technology entrepreneurship, and Fintech capstone project. Students from both Computational Finance and Financial Technology streams can apply for admission to the Joint Bachelor's Degree Program between City University of Hong Kong and Columbia University. Upon completion of this joint degree programme, students will receive the dual awards conferred by Columbia University and CityUHK. **Career Prospects** Computational Finance stream provides comprehensive training and internship opportunities to prepare students to establish competitive advantages in financial careers such as asset management, investment banking and risk management, as well as further advanced studies. Financial Technology stream prepares students for the careers in the emerging FinTech industry and business and technology sectors that require solid technology training and finance domain knowledge as well as further advanced studies. **Direct Admission to Joint Bachelor's Degree Program with Columbia University** Starting in 2026/27, JUPAS applicants can directly apply for Year 1 entry to the prestigious Joint Bachelor's Degree Program offered by CityUHK and Columbia University. Graduates will earn degrees from both institutions. A separate application to Columbia University is required after submitting the JUPAS application.

JUPAS Catalogue No.	JS1001
Programme Full Name	BBA Global Business (Features: 3 Exchanges/Joint Bachelor's Degree Program with Columbia University (US)/Overseas Summer School & Study Tour/Business Consultancy Project/Scholarship and Sponsorship) 工商管理學士(環球商業) (特點: 三次海外交流 / 美國哥倫比亞大學雙聯學士學位 / 海外暑期及遊學課程 / 商業諮詢課程 / 獎學金及資助)
Programme Short Name	BBAGBU

Short Description

Why BBA Global Business?

The BBA Global Business programme offers a globally oriented curriculum and opportunities for students to develop a global mindset, think strategically and contribute to companies doing business internationally. Our application-oriented courses prepare the next generation of managers to lead global teams. In the Global Business Consultancy Project, for instance, students will actually work in a multinational corporation and get involved in solving real business problems.

Students have opportunities to enhance their leadership and management skills while working with others from different cultures through study tours, executive forums, career development workshops, structured exchange programmes, internships, and case competitions. Students are offered three semester-based overseas exchange opportunities* (one compulsory and two optional) and take part in lots of other international immersion opportunities to widen their global exposure. High performing students can receive full sponsorship for studying at Harvard Summer School.

Students can apply for admission to the Joint Bachelor's Degree Program between City University of Hong Kong and Columbia University. Upon completion of this joint degree programme, students will receive the dual awards conferred by Columbia University and CityUHK.

** Subject to fulfilling the requirements for participating in the exchange studies.*

Career Prospects

Graduates of this programme are equipped with the knowledge and skills needed to work as associates in global companies, professional business consulting firms and marketing or management positions in firms doing business internationally. Some examples include:

- J.P. Morgan
- Blackrock
- HSBC
- Citibank
- Bank of America
- Ernst and Young
- BnP Paribas

Flagship Programme

This is one of the CityUHK's Flagship Programmes, which equip students with essential knowledge and skills, cultivate their global leadership abilities, and connect them with leading professionals. The Flagship Scholarships, which cover tuition and hall fees, a guaranteed berth, and a one-off exchange sponsorship of up

to HK$500,000, will be awarded to local JUPAS talents who meet the criteria.

Direct Admission to Joint Bachelor's Degree Program with Columbia University

Starting in 2026/27, JUPAS applicants can directly apply for Year 1 entry to the prestigious Joint Bachelor's Degree Program offered by CityUHK and Columbia University. Graduates will earn degrees from both institutions. A separate application to Columbia University is required after submitting the JUPAS application.

Programme Full Name	BBA Management (Streams: Human Resources Management / Strategy and International Management) 工商管理學士 (管理學) (專修：人力資源管理 / 策略及國際管理)
Programme Short Name	BBAMGMT
Short Description	**Department of Management** The Department aims at providing professional business knowledge and skills that are grounded in the latest research in Management. We are equipping students with the professional skills critical for job success, as well as the interpersonal and analytical skills necessary for developing a successful career locally and globally. **Why BBA Management** The BBA Management programme aims to equip students with the abilities and skills to successfully manage people and teams within an organisation and manage the organisation itself, in both local and international environments. Students of this programme will acquire the knowledge to meet management challenges including decision making, leading and motivating people, leading organisational change as well as strategising and implementing business decisions locally and internationally. The major offers a choice of two distinctive streams: Human Resources Management (HRM) and Strategy and International Management (SIM). Students can indicate their preferred stream at the beginning of Year 2. **HRM Stream:** The HRM stream is designed for students who wish to pursue a career as an in-house specialist or outside consultant in the human resource management area. **SIM Stream:** The SIM stream is designed to equip students with the knowledge and skills to develop effective strategies to manage in the international business environment, particularly in the Asia Pacific Region. **Study at Columbia University in Year 3 and Year 4:** Outstanding Year 1 students admitted to our four-year programme will be invited to apply for admission to Columbia University's Joint Bachelor's Degree Program. Students will have the option to major in Psychology or Economics at Columbia University. These students will get one degree certificate from Columbia University and another one from CityUHK after four years of study. **Career Prospects** Employers of our graduates in recent years include well-known organisations, such as Bank of China, EY, HK Jockey Club, Hospital Authority, HSBC, KPMG, Morgan Stanley, PwC. Graduates are working in highly sought after positions including management trainee, graduate trainee, business analyst, HR business partner, and HR executive. **Direct Admission to Joint Bachelor's Degree Program with Columbia University** Starting in 2026/27, JUPAS applicants can directly apply for Year 1 entry to the prestigious Joint Bachelor's Degree Program offered by CityUHK and Columbia University. Graduates will earn degrees from both institutions. A separate application to Columbia University is required after submitting the JUPAS

application.

JUPAS Catalogue No.	JS1007
Programme Full Name	BBA Marketing (Streams: Global Marketing / Marketing Analytics) 工商管理學士(市場學) (專修: 環球市場營銷 / 營銷數據分析)
Programme Short Name	BBAMKT
Short Description	

Why BBA Marketing?

CityUHK BBA Marketing stands out from other BBA and Marketing programmes by providing a pioneering approach that consists of:

i-Marketing +

- The “i” element of our programme refers to INTERACTIVE, INTERNATIONAL and INTERLLIGENCE. With its discovery-enriched curriculum design, students in CityUHK Marketing interact and connect with world-class professors, top business leaders, experienced alumni, and executives from partner companies. They are strong in teamwork, presentation, problem-solving, and communication with people of different backgrounds and cultures. As key technologies and trends will drive changes in the marketing industry, our various digital marketing courses are set to prepare students for facing the challenges of the digital marketing environment.

- The “+” symbolizes a comprehensive educational mindset that integrates curiosity, resilience, creativity, and practical application to prepare students for the AI era. Rather than simply teaching students to use technology, this approach cultivates irreplaceable human capabilities—such as asking insightful questions, exercising responsible judgment, and collaborating effectively—ensuring they command the process rather than just relying on tools. Ultimately, this "+" also encompasses the essential soft skills needed to navigate complex interpersonal relationships and develop optimal, tailored solutions for diverse marketing challenges.

Global Marketing Stream
The stream aims to equip students with marketing knowledge in a global context. Students are expected to be outgoing and culture-sensitive, and prepared to be exposed to marketing strategies and institutions in various regions and countries. They have to complete a foreign language course and may have a chance to join more than one exchange program during their study period. All of these efforts ensure students are well-equipped and possess a strong foundation to succeed in the future world of work.

Marketing Analytics Stream

The stream aims to prepare students to be big data marketing experts with advanced data analysis skills. They are capable of interpreting and utilizing data to develop effective marketing strategies. Students are expected to be strong in numeric skills and statistical knowledge and be proficient in social media and digital marketing. Students may participate analytics-related internships and professional certification courses outside the program to become certified professionals in the field.

Joint Degree Programmes with Columbia University, ESSEC Business School (ESSEC) and National Taiwan University (NTU)
The Department of Marketing distinctly encourages students to broaden their

horizons and to actively engage in exchange and overseas internship programmes. In line with its aspirations, the Department organises joint degree programmes with top universities - Columbia University, ESSEC Business School and National Taiwan University (NTU) - for elite students to obtain two internationally recognised degrees within 4 years. Through the programme, students can sharpen their awareness of culture while building all-rounded competitive strengths and developing a blueprint for their future career development.

- Columbia University is a world-renowned Ivy League institution located in New York City and consistently ranked among the top universities globally. Known for its academic excellence and distinguished alumni, including Nobel laureates, Columbia offers a dynamic and intellectually rigorous learning environment at the heart of a global metropolis. It provides students with a comprehensive interdisciplinary education that integrates strengths in business and the social sciences, equipping them with analytical, leadership, and global perspectives essential for future success.

- ESSEC Business School (ESSEC) is one of the top Business Schools in Europe and one of the few Business Schools well-recognised by all EQUIS, AMBA and AACSB. It is ranked #1 – Bachelor of Business Administration ranking 2025 - Le Point, and #1 – Bachelors of Business Schools 2025 – Le Figaro Etudiant. ESSEC provides internationalised education: one-third of its students are from 98 countries and it receives over 500 inbound exchange students from around the globe every year.

- National University of Taiwan (NTU) is the top university in Taiwan and ranked 63th on the QS World University Ranking in 2026, being the only university ranked within the Top 100 Universities in the World. NTU is the alma mater of many eminent Taiwanese, including the Nobel Prize winner.

Career Prospects

Marketing careers are not only exciting and rewarding, but can also lead to top management positions. Marketing is an ideal field for those who enjoy working in teams and formulating strategies for company growth.

Business Career Services

The Business Career Service is committed to helping you enhance your employability by guiding you through all stages of the career development process, and by providing you with personalised career consultation with a coordinated team of advisors, plus career development workshops and career fairs, recruitment events, and up-to-date career related information. We offer students unique opportunities to build sustainable networks with industry communities. We aim to achieve these goals through providing

- Personalised service
- Up-to-date information
- Sustainable networks
- Coordinated advisors

Direct Admission to Joint Bachelor's Degree Program with Columbia University

Starting in 2026/27, JUPAS applicants can directly apply for Year 1 entry to the prestigious Joint Bachelor's Degree Program offered by CityUHK and Columbia University. Graduates will earn degrees from both institutions. A separate application to Columbia University is required after submitting the JUPAS

application.

JUPAS Catalogue No.	JS1017
Programme Full Name	Intelligent Information Systems [Majors: BBA Global Business Systems Management / BBA Artificial Intelligence in Business] 智能資訊系統學 [主修: 工商管理學士(環球商業系統管理) 、工商管理學士(商業人工智能)]
Programme Short Name	IIS
Short Description	**Business IS Smart** Global tech giants including Amazon, Meta (formerly Facebook), Google, NVIDIA and Microsoft have fully rewritten business workflows powered by intelligent digital systems. Today's enterprises leverage the ABCD core stack – Artificial Intelligence, Big Data, Cloud Services and Digital Transformation – to streamline operations, unlock data-driven growth and launch customer-centric innovations at scale. The Department of Information Systems under CityUHK's College of Business holds two landmark global accolades: it is Hong Kong's largest IS department by undergraduate student and full-time faculty headcount, ranked 1st in Asia for Information Systems research (AIS 2019–2024) and 5th worldwide in the UTD Top 100 Business School IS Research Rankings (2017–2024) [1]. Rooted in world-class research, our department is dedicated to nurturing future-ready tech-business talent to thrive in tomorrow's smart economy. **Technology IS Reshaping Global Business** Generative AI, large language models, big data analytics and enterprise cloud infrastructure have become non-negotiable enablers of corporate digital transformation. Paired with social media ecosystems, 5G mobile technologies, Web3, FinTech and cybersecurity governance, these tools fuel innovation across core Hong Kong industries: financial services, professional audit & accounting, digital marketing, e-commerce and cross-border trade. Industry data confirms 92% of global corporations now deploy generative AI to boost operational efficiency, while 75% of C-suite leaders rely on big data analytics for strategic decision-making. Our curriculum aligns fully with this real-world industry shift, equipping students with practical, deployable tech-business skills. **Research IS Driving Cutting-Edge Innovation** Our faculty belongs to the world's elite cohort of Information Systems scholars, publishing high-impact research covering generative business AI, social network analytics, cloud governance, FinTech risk control, data privacy and digital entrepreneurship. We actively invite undergraduates to join supervised research projects, consulting case studies and academic publications alongside leading professors, opening pathways to postgraduate study and research-focused careers. **Practice IS Foundational to Career Success** Students gain direct exposure to real-world corporate challenges via exclusive networking sessions with CityUHK EMBA senior executives and our extensive global alumni network. We organise overseas study tours, Silicon Valley tech firm visits, Greater Bay Area FinTech project placements and international business competitions spanning Europe, North America and Asia-Pacific. The Department offers dedicated IS Smart Business Scholarships to reward outstanding academic performance and fund student participation in regional and global innovation contests. Our learners turn raw information systems technology into tangible business value for organisations of all sizes.

Information Systems IS Smart Business

We deliver a comprehensive, constantly updated curriculum covering today's most in-demand digital disciplines: social media analytics, mobile app development, generative AI & multimodal modelling, Python machine learning, big data visualisation, enterprise cloud architecture, IT audit and FinTech compliance.

Beyond technical know-how, students build high-value transferable strengths: cross-cultural communication, end-to-end project management, stakeholder consultation and ethical digital governance. Graduates graduate fully equipped to lead enterprise digital transformation and bridge the gap between business strategy and cutting-edge technology.

Today IS Your Starting Point

Upon admission to JS1017 Intelligent Information Systems, all Year 1 students complete shared core BBA business modules covering accounting, finance, marketing, management and foundational IT literacy. At the end of Year 1, you select one of our two specialised home majors:

AIB further offers four targeted specialist streams for Year 2–4 study: Business Intelligence (BI), Information Systems Auditing (ISA), Internet Services & Social Networks (ISSN), and Data Informatics (DI). All AIB students enjoy flexible double-major pathways paired with Accountancy, Finance, Marketing, Global Operations Management and Business Analysis. GBSM students secure two full semesters of overseas exchange at top partner universities across Europe, North America and Asia-Pacific.

1. BBA Global Business Systems Management (GBSM, JS1018 direct intake)
2. BBA Artificial Intelligence in Business (AIB, JS1019 direct intake)

Tomorrow IS Full of Boundless Career Opportunities

Our alumni pursue high-growth roles across multinational banks, Big Four audit firms, global tech corporations and leading FinTech enterprises, including:

- Graduate Management Trainee, Corporate Banking & Wealth Management (HSBC, Bank of China HK, JPMorgan, Morgan Stanley)
- Technology Risk Associate, IT Auditor, Digital Consulting (PwC, Deloitte, EY, KPMG)
- Data Scientist, Business Intelligence Analyst, AI Solutions Specialist (Apple, Amazon Web Services, Google, Alibaba, Tencent, NVIDIA, IBM)
- System Analyst, Digital Marketing Strategist, FinTech Product Manager, Tech Startup Founder

Graduates stand out in the job market thanks to their unique hybrid skill set: robust commercial judgement paired with hands-on AI, big data and cloud technical capabilities – a rare combination highly sought after by today's global employers.

Admission Arrangements

JUPAS applicants will be considered for admission to first-year studies at the Department of Information Systems. Students will enter a major (current major options: Global Business Systems Management; Artificial Intelligence in Business) after one year of study. The top 40% of students[#] will have a free choice of majors offered by the Department. The other 60% of students will be allocated a major

within the Department, subject to the availability of places and the selection criteria set by individual majors. Please click here for details.

 # based on CGPA with no failed grades and completion of at least 30 credit units including College/Department required courses

General Entrance Requirements

Core Subjects	Minimum Level
CHINESE LANGUAGE	3
CITIZENSHIP AND SOCIAL DEVELOPMENT	Attained
ENGLISH LANGUAGE	3
MATHEMATICS COMPULSORY PART	2

Elective Subject(s)	Minimum Level
ANY 2 SUBJECTS	3

Notes:

- Liberal Studies would be used as the alternative of the core subject requirement of Citizenship and Social Development.
- Unspecified electives may include Category A elective subjects, Mathematics extended modules (M1/M2) (except for JS1801) and Category C other languages subjects (Japanese: Level N3 or above; Korean: Grade 3 or above; French/German/Spanish: Level A2 or above; Urdu: Grade E or above) (except for JS1200, JS1201, JS1217, JS1300, JS1801, JS1805, JS1806 and JS1807). If students take both M1 and M2, they are counted as one subject only.
- Applied Learning (ApL) subjects are not counted as elective subjects, except for JS1040, JS1041, JS1042, JS1043, JS1044, JS1300, JS1805, JS1806 and JS1807.
- Please refer to the minimum entrance requirements webpage for details.
- Applicants who are marginally failed to meet the entrance requirements of the programme may still have opportunity of admission. CityUHK will continue the flexibility towards the minimum entrance requirements for JUPAS applicants in 2027/28 entry. The details of flexible admission arrangement can be found in CityUHK undergraduate admissions website.

Programme Full Name	BBA Global Business Systems Management (Features: Intelligent Technologies / Global Business / Study Exchange) 工商管理學士(環球商業系統管理) (特點: 智能科技 / 環球商業 / 海外及內地交流)
Programme Short Name	BBAGBSM
Short Description	**Why Study BBA Global Business Systems Management?** BBA Global Business Systems Management (GBSM) aims to nurture students to become smart business managers. **GBSM IS Smart Global** The best way to learn about the world is to experience it. Two semester-long exchanges to recognised universities in the US, Europe and/or Asia encourage our students to develop a global mindset. Enjoy a flexible curriculum and choose courses during your exchange that match your own interests and needs. **GBSM IS Smart Tech** Our students develop a technology mindset as they learn how modern information systems such as AI, big data and cloud services are transforming the business world. They can participate in a week-long Smart Business Study Tour to Stanford University and visit AAAF (Apple, Amazon, Alphabet and Facebook) companies in Silicon Valley, or join a one-month Smart Business Project Tour for visits and work experience in FinTech and/or BAT (Baidu, Alibaba and Tencent) companies closer to home. **GBSM IS Smart Business** Our students also develop a business mindset as they learn about new IS business strategies and Internet business models. Students gain the knowledge and skills to analyse high-growth technology companies and make wise investment decisions. They also develop good communication and project management skills, which prepare them for management trainee jobs in multinational companies. **GBSM IS a Smart Choice** Our students have opportunities to conduct undergraduate research or consulting projects with faculty members in the largest IS department in Hong Kong and one of the best IS department in research productivity in the world [1]. The Department provides Smart Business scholarships to support our undergraduate students in regional and international business competitions. Our students make business smart with information systems. **GBSM IS Smart Future** Our graduates begin their careers as management trainees and business analysts in global banks, consulting and technology firms, such as HSBC, BOC, PWC, Apple, Alibaba, Facebook, Google and IBM. In 2018, 94% of our graduates were hired immediately after graduation and 6% of our graduates went overseas for further studies. The highest and average monthly salaries of our graduates from BBA Global Business Systems Management were approximately HK$60K and HK$24K, respectively. Their average salaries were 36% higher than those of BBA graduates of the Business College. *[1] Research Ranking of the Association for Information Systems (http://www.aisnet.org/)*

JUPAS Catalogue No.	JS1019
Programme Full Name	BBA Artificial Intelligence in Business (Streams: Business Intelligence / Information Systems Auditing / Internet Services and Social Networks / Data Informatics) 工商管理學士 (商業人工智能) (專修: 商務智能 / 信息系統審計 / 互聯網服務及社交網絡 / 數據信息學)
Programme Short Name	BBAAIB
Short Description	**Why Study BBA BBA Artificial Intelligence in Business?**

BBA Artificial Intelligence in Business (AIB) cultivates future-ready smart business professionals who bridge cutting-edge intelligent technology and corporate strategy. Rooted in the ABCD framework – Artificial Intelligence, Big Data, Cloud Services and Digital Transformation – the programme equips students to deliver tangible business value amid global digital transformation.

AIB IS Smart Double Major

Students enjoy flexible, official double-major pathways within CityUHK College of Business, pairing AIB with Accountancy, Finance, Marketing, Business Analysis or Global Operations Management.

Hong Kong's core economic pillars – financial services, professional audit & consulting, cross-border trading, logistics and digital commerce – are undergoing full-scale AI and big data-powered transformation. As enterprises rush to deploy generative AI, there is unprecedented market demand for hybrid talent with both business acumen and technical know-how, opening abundant high-growth career pathways for our graduates.

AIB IS Smart Innovation

Students master the full toolkit of modern intelligent information systems (generative AI, large language models, big data analytics, enterprise cloud infrastructure) to design and launch scalable business innovations.

Two flagship overseas experiential programmes are exclusive to BBAIS students:

1. One-week Summer Smart Business Study Tour: Visit top universities across the Netherlands, Paris, Singapore, Japan, South Korea, the US and Canada, plus leading AAAF tech giants in Silicon Valley – Apple, Amazon, Alphabet and Meta (formerly Facebook) – to witness real-world AI product development.
2. One-month Greater Bay Area Smart Business Project Tour: Combine corporate site visits and supervised hands-on project experience at FinTech institutions and BAT enterprises (Baidu, Alibaba, Tencent), exploring regional digital economy and cross-border e-commerce use cases.

AIB IS Smart Business

Students build robust commercial strategic thinking through exposure to state-of-the-art intelligent systems frameworks and agentic digital business models. They learn to evaluate fast-growing tech unicorns, interpret market data and deliver data-backed investment recommendations.

The curriculum systematically strengthens cross-cultural communication, cross-functional coordination and end-to-end project management capabilities, fully preparing graduates to take specialist and project leadership roles within multinational corporations, Big Four firms and global tech enterprises.

AIB IS Smart Choice

Our department is Hong Kong's largest Information Systems department by undergraduate cohort and full-time academic staff, ranked 1st in Asia for AIS IS research (2019–2024) and 5th globally in UTD Top 100 Business School IS Research Rankings (2017–2024) [1]. Students can collaborate closely with world-class faculty on undergraduate research projects or industry consulting engagements.

The department offers dedicated IS Smart Business Scholarships to reward outstanding academic performance and fully fund student participation in regional and international innovation, AI and business case competitions.

Four targeted specialist streams are available from Year 2 onwards to tailor your expertise to your career goals:

- Business Intelligence (BI): Python machine learning, data visualisation, predictive analytics for finance and retail
- Information Systems Auditing (ISA): Cybersecurity governance, IT compliance, risk management, aligned with CISA / ITCA professional certifications
- Internet Services and Social Networks (ISSN): Digital marketing, O2O operations, social media analytics, SEO & customer relationship management
- Data Informatics (DI): Statistical modelling, SAS analytics, data-driven business decision systems

AIB IS Smart Future

Our graduates pursue in-demand hybrid tech-business roles across global banks, Big Four audit & risk advisory firms, international tech corporations and FinTech start-ups, including:

Data Scientist, Business Intelligence Analyst, AI Solutions Specialist, IT Auditor, Technology Risk Consultant, Digital Marketing Strategist, Systems Analyst, FinTech Product Manager, Graduate Technology Trainee.

Key employers include HSBC, Bank of China (HK), JPMorgan, Morgan Stanley, PwC, Deloitte, EY, KPMG, Apple, Amazon Web Services, Google, Meta, Alibaba, Tencent, IBM and local Hong Kong Exchanges & Clearing Limited (HKEX).

Updated Career & Advancement Highlights (2026 Latest)

1. Industry demand: 92% of global corporations deploy generative AI to streamline operations; 75% of C-suite leaders rely on big data analytics for strategic decision-making, creating sustained demand for AIB graduates with dual business-tech expertise.
2. Fast-track postgraduate pathway: AIB BI Stream students are eligible for the 3+1 integrated undergraduate + taught postgraduate scheme, earning a Master of Science in Business Information Systems one year ahead of standard schedules.
3. Professional certification support: ISA stream coursework directly maps to ISACA's ITCA stackable certification, accelerating career progression in IT audit, cybersecurity and regulatory compliance.
4. Career progression: Recent AIB alumni commonly secure starting salaries ranging HK$24,000–HK$35,000 monthly; specialists in data analytics, AI consulting and FinTech risk regularly achieve higher remuneration packages. Many graduates pursue postgraduate studies in AI, FinTech, business analytics or management at top overseas universities after graduation.

Programme Short Name	BBABDAN
Short Description	**Why BBA Business Decision Analytics?** The BBA Business Decision Analytics (BDAN) programme aims to develop students' qualitative and quantitative ability to solve business problems and make decisions through DEEP data analysis. We consist of two study streams: **Decision Analytics Stream** • Provide professional training in business analytics, statistics, business intelligence (big data analysis), risk management, business knowledge and communication skills • Develop students' ability to manage and to analyze huge volume of business data using modern computer software which are popularly used in global business world • Enable students to solve business problems by a judicious application of technical and practical skills • Enable students to obtain internationally recognized professional qualifications such as SAS certification and Financial Risk Manager (FRM) Examinations • Prepare students for a statistical and analyst position in the financial, commercial, and government sector **Data Informatics Stream** • Provide professional training in data analytics, information management, business knowledge and communication skills • Enable students to acquire knowledge in two different industries: Data Analytics and Information Systems • Enable students to obtain international professional qualifications (Base SAS) • Prepare students to work in the areas which require both data analytics and information management knowledge **BBA Business Decision Analytics students are eligible to apply for the following joint degree programme:** • Joint Bachelor's Degree Program between City University of Hong Kong and Columbia University **Direct Admission to Joint Bachelor's Degree Program with Columbia University** Starting in 2026/27, JUPAS applicants can directly apply for Year 1 entry to the prestigious Joint Bachelor's Degree Program offered by CityUHK and Columbia University. Graduates will earn degrees from both institutions. A separate application to Columbia University is required after submitting the JUPAS application. **RSS Accreditation** The BDAN programme received accreditation from the Royal Statistical Society (RSS), U.K., recognising its standards in statistics and data analytics. Graduates are awarded Graduate Statistician (RSS) status and are eligible to pursue the Chartered Statistician (RSS) qualification after five years of work experience.

Career Prospects

Our graduates are prepared to work in the areas which require data analytics, statistics and information management knowledge.

Programme Full Name BBA Global Operations Management (Features: Supply Chain Management / Operations Efficiency / Process Improvement / Operations Analytics / Resource Planning)
工商管理學士(環球營運管理) (特點: 供應鏈管理 / 營運效率 / 流程改善 / 營運分析 / 資源規劃)

Programme Short Name BBAGOM

Short Description

Why BBA Global Operations Management?

In today's competitive market, cost efficiency, customer responsiveness, and operational flexibility are critical to business success. Companies increasingly rely on global supply chains to source goods and serve customers worldwide, which makes strategic planning and technological innovation essential for achieving operational excellence. By analysing business flows and processes to identify bottlenecks and resolve inefficiencies, operations management helps organizations co-create value with customers, improve performance, and support sustainable profitability.

The BBA Global Operations Management (GOM) programme equips students with strong analytical skills and trains them to apply data-driven methods in diagnosing business problems and addressing operational inefficiencies. Through a mix of workshops, field trips, and in-class learning, students learn to effectively manage resources, which may include people, time, and money. Our programme's integrated curriculum combines a solid business foundation with advanced topics such as supply chain management and quality management, preparing graduates for operations-focused roles in a global economy.

Career Prospects

BBA GOM graduates are prepared for careers in logistics, procurement and sourcing, retail management, supply chain management, consulting, and financial operations. Our students typically start as management trainees and analysts, rising to managerial roles as they gain experience in their chosen industries.

Programme Short Name	SCM
Short Description	The School of Creative Media (SCM) is the region's pioneering institution, first of its kind, dedicated to nurturing the next generation of interdisciplinary artists and creative media professionals. Our mission is to inspire innovative ideas and technologies that will shape the creative industries in Hong Kong, mainland China, across the world. At SCM, students receive comprehensive training that spans various fields, including computer science, fine arts, visual design, creative writing, cultural studies, and digital technology. We bridge the boundaries between art and science and integrate traditional and new media. We value applied creativity, cultural awareness and critical thinking as much as business sense and entrepreneurial success. Our internationally recruited faculty members are among the foremost artists and researchers in the field, bringing a global perspective and forging many institutional partnerships for the School. Our graduates consistently demonstrate high employability, with the majority now working as independent artists and professionals in the creative industries, film, television, advertising, publishing, media production and information technology. Many have won prestigious international and local awards for creative and technical innovation. With strengths arising from a unique mix of East and West, Hong Kong has seen a major expansion in its creative economy and has emerged as a thriving hub of new media culture in Asia and the world. The CityUHK School of Creative Media has played an instrumental role in this development as the leading force in creative media education and research in Hong Kong. BA Creative Media and BAS New Media students are eligible to apply for the following joint degree programme: • Joint Bachelor's Degree Programme between City University of Hong Kong and Leuphana University **Admission Arrangements** JUPAS applicants will be considered for admission to first-year studies at the School of Creative Media. Students will have a free choice of majors [current major options: Creative Media (BA); Creative Media (BSc); New Media (BAS)] offered by the School after one year of study.

文學士(創意媒體) (特點: 動畫 / 電影及攝影 / 批判理論及實踐 / 遊戲及可玩媒體 / 新媒體藝術 / 聲音藝術)

Programme Short Name BACRM

Short Description

This major is an innovative programme that advocates inter-medial creative practices. The programme fuses art, culture and media technology, covering a wide range of subjects such as cinema, animation, photography, sound, installation, interactive media, video games and new media art. The curriculum strongly focuses on applied learning and integrated training in creativity and technology. Students are expected to develop professional competency and creative and critical thinking via hands-on learning and studio practice.

This major is designed to train creative talents and practitioners who not only possess cultural sensibility but are also equipped with strong technological literacy, ready and adaptable for the cultural sphere, creative industries and media sector of the 21st century.

BA Creative Media students are eligible to apply for the following joint degree programme:

- Joint Bachelor's Degree Programme between City University of Hong Kong and Leuphana University

C other languages subjects (Japanese: Level N3 or above; Korean: Grade 3 or above; French/German/Spanish: Level A2 or above; Urdu: Grade E or above) (except for JS1200, JS1201, JS1217, JS1300, JS1801, JS1805, JS1806 and JS1807). If students take both M1 and M2, they are counted as one subject only.

- Applied Learning (ApL) subjects are not counted as elective subjects, except for JS1040, JS1041, JS1042, JS1043, JS1044, JS1300, JS1805, JS1806 and JS1807.
- Please refer to the minimum entrance requirements webpage for details.
- Applicants who are marginally failed to meet the entrance requirements of the programme may still have opportunity of admission. CityUHK will continue the flexibility towards the minimum entrance requirements for JUPAS applicants in 2027/28 entry. The details of flexible admission arrangement can be found in CityUHK undergraduate admissions website.

Remarks:

- For details of the alternative Chinese Language qualifications acceptable by the University for Non-Chinese Speaking (NCS) students, please click here.

Calculation of scores for applicants with more than 1 sitting in HKDSE Examination

CityUHK accepts repeat results and will use the best results in assessing whether applicants fulfil the entrance requirements and to calculate admission scores.

Programme Entrance Requirements

Same as General Entrance Requirements
Notes for Elective Subject(s):

"Attained with Distinction I or II" in the following Applied Learning subjects may be accepted as one elective subject for JS1042:

- Subjects under the following Applied Learning course clusters (subject list available at the Education Bureau website):
  - Design Studies
  - Media Arts
  - Performing Arts
  - Films, TV and Broadcasting Studies
  - Media Production and Public Relations
  - Medical Science and Health Care
  - Psychology
  - Civil, Electrical and Mechanical Engineering
  - Information Engineering
  - Services Engineering
  - Business Studies ('Data Application for Business' course only)

Portfolio Submission:
HKDSE applicants who select JS1042 as their Band A or B choices are highly recommended to submit a portfolio of creative works to the School of Creative Media (SCM) via an online system. Applicants who select the School as other band choices are also welcome to submit a portfolio of creative works. Details of the portfolio submission will be announced towards the end of 2026 via the School's homepage at https://www.scm.cityu.edu.hk/content/portfolio-submission.

Consideration may also be given to employment, travel and other examples of life experience.

Programme Full Name BSc Creative Media (Features: Combination of Creative Media and Computer Science Courses / Animation / Games / Installation / Interactivity)
理學士(創意媒體) (特點: 結合創意媒體及電腦科學課程 / 動畫 / 遊戲 / 裝置藝術 / 互動媒體)

Programme Short Name BScCRM

Short Description

This major produces creative media professionals who are proficient in computing technology. It combines core courses from the School of Creative Media and the Department of Computer Science to produce graduates who are able to bridge the gap between the technical and artistic sides of the media field.

Students also gain a solid foundation in creative processes, including video, sound, photography, storytelling, game design, animation, computer graphics, installation and interactive digital media production. Graduates use the latest computing and media technologies in the creation of various media including computer games, UI/UX, animation, special effects, artificial intelligence, wireless and mobile media, internet application, virtual/augmented/mixed reality and interactive installation.

Programme Full Name BAS New Media (Features: Media Art / Robotics & AI / Art & Technology / Materials & Digital Fabrication)
文理學士(新媒體) (特點: 媒體藝術 / 機械人學及人工智能 / 藝術及科技 / 物料及數位製造)

Programme Short Name BASNEM

Short Description

Media creators are increasingly using scientific concepts in their work. Multimedia artists and creative technologists are also learning to collaborate with scientists when producing their work. This major develops lateral thinking and cross-professional understanding, equipping graduates for success in an increasingly interdependent and integrated world.

Students use technology as an artistic medium to generate learning and original research learning in a progressive and interdisciplinary context that bridges art, science, technology, and the humanities. The curriculum encourages creative and critical thinking in the domain of digital content, and the successful expression of a socially engaged personal vision through digital media. Graduates receive professional training in state-of-the-art facilities, preparing them for future careers that combine art, science and technology in the creative industries, innovative education, and cultural management.

This major is especially suited to students who are not afraid to break down the barriers between the arts and the sciences.

BAS New Media students are eligible to apply for the following joint degree programme:

Joint Bachelor's Degree Programme between City University of Hong Kong and Leuphana University

Programme Full Name International Sustainability Programme for Innovation, Research & Entrepreneurship(INSPIRE) (Majors: BEng Energy Science & Engineering/BEng Environmental Science & Engineering +Features: Global Focus)
環球可持續發展科創課程 [主修: 工學士(能源科學及工程學) / 工學士(環境科學及工程學) + 特點：環球視野]

Programme Short Name INSPIRE

Short Description

The INSPIRE programme offers a comprehensive and globally focused education in energy and environmental engineering. It expands on the existing Energy Science and Engineering (ESE) and Environmental Science and Engineering (EVE) programmes by incorporating enhanced overseas study experiences, internships, research components, mentorship support and entrepreneurial training. Students will benefit from the specialized existing curriculum in energy, environment and sustainability, along with extensive training in global perspectives, innovative mindset and research. The INSPIRE programme aims to prepare students for success in the field and contributes to sustainable development.

Flagship Programme

This is one of the CityUHK's Flagship Programmes, which equip students with essential knowledge and skills, cultivate their global leadership abilities, and connect them with leading professionals. The Flagship Scholarships, which cover tuition and hall fees, a guaranteed berth, and a one-off exchange sponsorship of up to HK$500,000, will be awarded to local JUPAS talents who meet the criteria.

Programme Full Name	Energy and Environment (Majors: BEng Energy Science and Engineering / BEng Environmental Science and Engineering) 能源及環境學 [主修: 工學士(能源科學及工程學) / 工學士(環境科學及工程學)]
Programme Short Name	SEE
Short Description	The **School of Energy and Environment (SEE)** performs cutting-edge research and provides professional education in energy- and environment-related issues. The School is designed to tackle interactive relationship between energy and environment through the development of new scientific understanding and new technologies as well as the training of new professionals with broad knowledge in the areas of energy and environment. We have a highly internationalised and experienced faculty from various countries specialising in atmospheric and climate science, biological science, chemistry, chemical engineering, energy economics, environmental engineering, environmental policy, mechanical engineering and materials science. SEE endeavours to produce a new breed of engineers and professionals capable of solving energy and environmental problems. We currently offer the following majors: • Bachelor of Engineering in Energy Science and Engineering • Bachelor of Engineering in Environmental Science and Engineering Students start with a common year of foundation study. The content of our programmes covers a wide spectrum of areas, allowing students to explore knowledge in a number of environments. At the beginning of their studies, they develop a broad scientific foundation by studying courses in basic science, covering mathematics, computer science, physics, chemistry and biology before they are guided through an in-depth exploration of environment and energy issues. Students declare their majors after completing the foundation courses in the first year. **Admission Arrangements** JUPAS applicants will be considered for admission to first-year studies at the School of Energy and Environment. Students will enter a major (current major options: Energy Science and Engineering; Environmental Science and Engineering) after one year of study. The top 40% of students# will have a free choice of majors offered by the School. The other 60% of students will be allocated a major within the School, subject to the availability of places and the selection criteria set by individual majors. *# based on CGPA with no failed grades and completion of at least 30 credit units including School required courses*

Programme Full Name BEng Environmental Science and Engineering and BBA Finance (Double Degree; Features: Environmental, Social & Governance (ESG) / Green Finance / Environmental Technology / Interdisciplinary Education)
工學士(環境科學及工程學)與工商管理學士(金融)[雙學位；特點：環境、社會和管治 / 綠色金融 / 環保技術 / 跨學科教育]

Programme Short Name BEngESE&BBAFIN

Short Description

As the demand for professionals with expertise in environmental engineering, green finance, and Environmental, Social, and Governance (ESG) continues to rise, it has become increasingly apparent that there is a shortage of local financial professionals with expertise in ESG. Given Hong Kong's strength as an international financial centre, it is imperative to further establish its status as a preferred ESG investment hub. Investors will likely shift their priority to companies with high ESG performance and commitment towards carbon neutrality. Moreover, areas like green finance and carbon emission trading are gaining importance in the financial field.

Therefore, the **School of Energy and Environment (SEE)** , in collaboration with the Department of Economics and Finance, offers the double degree programme, the **Bachelor of Engineering in Environmental Science and Engineering and Bachelor of Business Administration in Finance**. Through this double degree programme, students will receive a rigorous and comprehensive education in both environmental engineering and finance. They will acquire the necessary skills and knowledge to address the challenges of sustainable finance, not just in Hong Kong but also in the global context. By bridging the gap between these two fields, graduates of this programme will be well-prepared to tackle complex sustainability issues from a multidisciplinary perspective.

理學士(環境及可持續發展商業) [特點：環境科學 / 商業可持續發展 / 環境、社會和管治]

Programme Short Name BScESB

Short Description The Bachelor of Science in Environment and Sustainable Business is a four-year undergraduate programme jointly offered by the **School of Energy and Environment (SEE)** and the College of Business (CB). This programme is designed to equip students with strong foundations in environmental science and technologies, and business knowledge to tackle climate change-related challenges and to achieve sustainability goals. At the same time, the students will stay abreast with the latest trends and technologies, including renewable energy integration and circular economy initiatives, that underpin investment decision-making for sustainable finance. Distinguished industry experts, hailing from prominent organizations in Hong Kong, will share their expertise through guest lectures, fostering experiential learning and industry connections. Students will actively participate in real-world sustainable business projects, cultivating practical skills in sustainability assessment, Environmental, Social and Governance (ESG) integration, and impact investing. Graduates of the programme will possess a comprehensive understanding of sustainability in practice, equipped to navigate the challenges and seize the business opportunities created by more climate change related regulations and policies.

Programme Full Name	Bachelor of Laws 法律學學士
Programme Short Name	LLB
Short Description	The School of Law aspires to be an internationally renowned centre for legal research and teaching in the Asia-Pacific region. The School's mission is to provide students with an excellent education and to contribute to the advancement of knowledge. Through cooperation with other law schools and professional organisations, the School aims to foster an environment in which both students and staff can develop and use their legal knowledge, professional skills and expertise for the benefit of the entire Hong Kong community. The Bachelor of Laws (LLB) programme is delivered over four years and emphasises the acquisition and development of wide-ranging legal and intellectual skills. Learning and teaching are interactive and aligned with intended learning outcomes. Students are trained to apply laws and legal principles to solve real-life problems. The LLB programme provides a firm foundation for a career in law and law-related fields, public service and post-graduate studies in Hong Kong and overseas. Students receive a well-rounded legal education from our staff, all of whom are distinguished teachers and scholars from Hong Kong, the Chinese Mainland, the UK, Australia, India, Malaysia, etc. In addition, students have the opportunity to be taught by visiting faculty from law schools all around the world. Our LLB programme guides students to develop the skills, knowledge and attitude required to put them within the best and brightest minds applying for jobs in law, business, civil service, banking and other fields. **Flagship Programme** This is one of the CityUHK's Flagship Programmes, which equip students with essential knowledge and skills, cultivate their global leadership abilities, and connect them with leading professionals. The Flagship Scholarships, which cover tuition and hall fees, a guaranteed berth, and a one-off exchange sponsorship of up to HK$500,000, will be awarded to local JUPAS talents who meet the criteria.

Programme Full Name Bachelor of Laws and BBA Accountancy (Double Degree)
法律學學士與工商管理學士(會計) (雙學位)

Programme Short Name LLB&BBAAC

Short Description

The School of Law and the Department of Accountancy are internationally renowned for the strengths of their respective disciplines. Their work is linked with the financial and corporate sectors, which often have legal disputes that can only be solved by those with a detailed knowledge of accounting. Students in the double degree programme will acquire wide-ranging legal knowledge and skills that will enable them to progress to professional legal training, and will also acquire foundational knowledge that can assist them to qualify as accountants. The graduates of the double degree programme, the Bachelor of Laws and Bachelor of Business Administration in Accountancy, benefit from a rigorous legal education combined with solid academic training in accounting within a global business mindset. It is thus expected that they will be highly sought after for positions in the commercial and financial sectors.

The double degree will prepare students for a career in the legal and financial sectors, and they will also have the option to become a legal professional. Students will receive a well-rounded education from our staff, which includes distinguished teachers and scholars from Hong Kong, Chinese Mainland, the UK, Australia, India, and Malaysia. In addition, students will have the opportunity to be taught by visiting faculty from law schools all around the world.

Programme Full Name Bachelor of Laws and Bachelor of Science in Computer Science (Stream: Artificial Intelligence) (Double Degree)
法律學學士與理學士(計算機科學) (專修: 人工智能)(雙學位)

Programme Short Name LLB&BScCS

Short Description

The School of Law and the Department of Computer Science are internationally renowned for the strengths of their respective disciplines. The rapid advancement of artificial intelligence (AI) and related technologies presents novel legal and ethical challenges. This changing landscape creates a growing demand and a critical need for legal professionals who possess both a deep understanding of legal principles and a strong technical foundation in computer science, particularly AI.

To meet this need, the LLB&BScCS programme exposes students to interdisciplinary approaches, enabling them to draw meaningful connections between law and technology. By bridging the gap between these fields, the programme prepares students to thrive in an evolving professional environment and respond effectively to the demands of modern legal practice. Consequently, graduates will be uniquely equipped to navigate complex legal challenges in a technology-driven landscape, significantly enhancing their competitiveness in the job market.

人工智能．計算．突破課程(特點: 自由選擇學院專業學科 / 一對一專業導師 / 精英學生實習培訓 / 專業導師指導計劃 / 頂尖海外大學交流)

Programme Short Name ACT

Short Description

The ACT stream option stands as a pioneering initiative in data science, computer science and AI education. It aims to offer exceptional students a comprehensive education in these fields, and unparalleled opportunities to gain valuable international exposure and practical experience through overseas exchanges and elite work placements at renowned universities and leading worldwide companies. Admitted students will have the flexibility to select their preferred major upon accepting the offer. The available majors for the ACT stream option are:

- BSc Computer Science (stream: ACT)
- BSc Cybersecurity (stream: ACT)
- BSc Data Science (stream: ACT)
- BSc Data and Systems Engineering (stream: ACT)

Flagship Programme

This is one of the CityUHK's Flagship Programmes, which equip students with essential knowledge and skills, cultivate their global leadership abilities, and connect them with leading professionals. The Flagship Scholarships, which cover tuition and hall fees, a guaranteed berth, and a one-off exchange sponsorship of up to HK$500,000, will be awarded to local JUPAS talents who meet the criteria.

Programme Full Name Data Science (Majors: BSc Data Science / BSc Data and Systems Engineering)
數據科學 [主修：理學士 (數據科學) / 理學士 (數據與系統工程)]

Programme Short Name DS

Short Description

City University of Hong Kong offers two unique undergraduate programmes, BSc Data Science and BSc Data and Systems Engineering, which are designed to cultivate data science professionals capable of applying and creating the data science knowledge required to support social and economic development in Hong Kong and beyond. Data science, as a rapidly growing field, focuses on solving problems and furthering social progress using vast amounts of data collected in various industries, commerce and applied sciences. A data science professional is trained to use and extract insights from these data, apply to and solve real-world problems in the data realm responsibly.

BSc Data Science cultivates data scientists and data science professionals with rigorous theoretical and methodological knowledge of data science along with in-depth analysis and evaluation for applied problems.

BSc Data and Systems Engineering cultivates data scientists and advanced data engineers with a solid understanding of the tools and techniques, with a focus on managing data and applying data science techniques to solve social, business and industrial problems.

Admission Arrangements

JUPAS applicants will be considered for admission to first-year studies at the Department of Data Science. Students will have a free choice of majors [current major options: BSc Data Science; BSc Data and Systems Engineering] offered by the Department after one year of study.

Programme Full Name BSc Data Science (Features: Data Science / Machine Learning / Data Mining / Big Data Analysis)
理學士(數據科學) (特點: 數據科學 / 機器學習 / 數據挖掘 / 大數據分析)

Programme Short Name BScDSC

Short Description

The BSc Data Science aims to provide data science graduates with essential training in the quantitative methods, statistical analysis techniques, data mining technology and computing tools required for the effective use and analysis of big and complex data for real-world applications that involve making sense of complex data to realize planning and decision making. The programme develops strong and interdisciplinary training in the ability to build data analysis reasoning, communication skills and ethic awareness in realistic inter-professional settings for commercial or public policy problems in various disciplines.

The programme provides three flexible areas of advanced knowledge:

1. Artificial Intelligence
2. Social Media Analytics
3. Statistical Learning

Programme Full Name BSc Data and Systems Engineering (Features: Data Science / FinTech & Decision Analytics / Industrial AI / Smart City)
理學士(數據與系統工程) (特點: 數據科學 / 金融科技 / 工業人工智能 / 智慧城市)

Programme Short Name BScDSE

Short Description

Offering a solid foundation in data science and intelligent systems, the BSc Data and Systems Engineering programme equips students with strong analytical and decision-making skills, enabling them to analyse, manage and improve enterprise-class systems. The enterprises considered may be businesses, governmental institutions or service-oriented engineering organisations. Main data science application subjects in this programme covers data-driven financial technologies, smart city, artificial intelligence, and industrial internet of things.

BSc Data and Systems Engineering students are nurtured to become analytically minded and versatile graduates capable of collecting, analysing and interpreting big data. With such skills, they are proficient at transforming vast amounts of information into actionable insights, enhancing decision-making in their organisations.

The programme provides three flexible categories of advanced knowledge:

1. FinTech & Decision Analytics
2. Industrial AI
3. Smart City

Programme Full Name	BSocSc International Relations and Global Affairs (Streams: Asian Studies / International Studies / Development Studies) 社會科學學士(國際關係及全球事務) (專修: 亞洲研究 / 國際研究 / 發展研究)
Programme Short Name	BSocScIRGA
Short Description	The Department of Public and International Affairs is a multidisciplinary department with a multinational faculty and a strong international orientation. With faculty members graduating from many of the world's top universities and with a commitment to leading edge research and high quality teaching, the Department can lay a strong claim to be the leading department in its field in the region. The Department currently offers the following majors: • BSocSc International Relations and Global Affairs • BSocSc Public Affairs and Management The Bachelor of Social Sciences in International Relations and Global Affairs programme explores Asia's place in the contemporary world and Hong Kong's strategic position in the region and the world. It aims to develop students' knowledge of socio-political, economic, and cultural processes of change occurring in Asia and to situate them in the broader international context, reflecting the increasing significance of Asia in world affairs. Through its interdisciplinary curriculum and training in social research, the International Relations and Global Affairs major seeks to equip students with analytic skills of value to organizations in diverse economic sectors in Hong Kong, Asia and beyond. The programme is taught by faculty members from diverse disciplines of sociology, anthropology and political science. It enhances students' critical reasoning and problem-solving skills, and extends and deepens their regional and global perspectives. Four-year degree students enrolled at the City University of Hong Kong have a chance to apply for admission to the Joint Bachelor's Degree Program between City University of Hong Kong and Columbia University during their second year. Students admitted to the Joint Program will earn two bachelor degrees, awarded by the two universities. Upon graduation, students are well equipped to pursue careers in both public and private sectors in a variety of fields, including business, project-planning and management, public relations, politics, research and education, mass media, politics, social enterprises and non-governmental and community organizations. **Direct Admission to Joint Bachelor's Degree Program with Columbia University** Starting in 2026/27, JUPAS applicants can directly apply for Year 1 entry to the prestigious Joint Bachelor's Degree Program offered by CityUHK and Columbia University. Graduates will earn degrees from both institutions. A separate application to Columbia University is required after submitting the JUPAS application.

JUPAS Catalogue No.	JS1103
Programme Full Name	BA Chinese and History (Streams: Chinese / History and Cultural Heritage) 文學士(中文及歷史) (專修: 中文 / 歷史及文化遺產)
Programme Short Name	BACHIS
Short Description	Founded in 2014 with a view to establishing excellent tertiary education, world-class research and an international reputation in Hong Kong, the Department of Chinese and History offers the major in Chinese and History with two streams - a) Chinese & b) History and Cultural Heritage. It aims to equip students with advanced and professional knowledge and a wide range of analytical and writing skills. Students will enter a stream (current stream options: Chinese, History and Cultural Heritage) after one year of study. The Chinese Stream strives to provide students with a solid and comprehensive training in Chinese language, Chinese literature, history and philosophy. The knowledge is both ancient and modern, and can be widely used in daily life. The training equips students with both in-depth knowledge and research skills for further academic work as well as for career development in the education, public affairs, administration, literature studies, media, editing and creative industries involving the use of Chinese. The Chinese Stream consists of four specialized areas of study, which are (1) Chinese language and literature, (2) Classical and modern Chinese literature, (3) Chinese classics and philosophy, and (4) Language use and writing. History and Cultural Heritage Stream equips the students with comprehensive and in-depth knowledge of history, particularly Chinese history knowledge. It also aims to provide the students with the necessary training as cultural professionals with historical background. History seeks to provide the student knowledge on past events, memories, collections, and interpretations of the past. It also trains the students to examine the cause-and-effect relationships in human affairs and addresses the complexity of the past in shaping contemporary society. Although Chinese history is the primary focus of the stream, it also offers the students courses related to world history and public history to acquire historical knowledge to understand other nations' different histories and cultures. History as a discipline is in their very process to synthesize other fields of social sciences, including anthropology, sociology, and economics, not to mention cultural history, to which Cultural Heritage belongs. Without a relatively systematic knowledge of History, it is difficult for a student to master the knowledge of Cultural Heritage well. On the other hand, locating Cultural Heritage within and with History, Cultural Heritage can provide a cultural perspective for students of History in return. This stream is designed based on these two inseparable and interactive parts of "History" and "Cultural Heritage". History and Cultural Heritage Stream provides the professional training necessary to nurture high caliber history-related professionals with cultural perspective and cultural professionals with historical knowledge. It meets the growing workforce needs resulting from the rapidly expanding capacity in history-related industries including education, libraries, publishing, mass-media, etc., and culture-and-heritage-related industries, including cultural tourism, museum management, exhibition industries, commercial galleries and archives, community heritage programs, entertainment and arts-related professions, cultural and creative industries, in the Greater Bay Area, particularly Hong Kong. It educates students to become historical and cultural professionals who are culturally literate and competent in managing and marketing culture and heritage, with extensive knowledge of Chinese history and Chinese cultural heritage, including knowledge of

Hong Kong's history and cultural heritage. It also educates the students to understand Hong Kong's unique position in integrating the East and West cultures. For this goal, this stream also strives to educate the students to become cultural professionals with highly proficient English-language ability to promote one's culture and heritage and understand and respect the historical and cultural differences of other nations. Last but not least, History and Cultural Heritage Stream promotes professionalism in History and Culture and Heritage in support of maintaining Hong Kong's leading role in culture- and heritage-related professions and provides expert advice on the promotion of culture and the protection and preservation of heritage in the context of Hong Kong both as part of China and as an international city.

Students who choose to major in Chinese and History will enjoy the significant advantages of integrating the two streams and our interdisciplinary emphasis, and may go on to pursue a wide range of careers after graduation.

JUPAS Catalogue No.	JS1104
Programme Full Name	BA English (Streams: English and Professional Communication / Language and Literature) 文學士(英語語言) (專修: 英語及專業傳意 / 語言及文學)
Programme Short Name	BAEN
Short Description	The Department of English at City University of Hong Kong is an international leader in research on and the teaching of English Studies. The Department is one of the most creative and dynamic English departments in the Asia-Pacific region, and is committed to providing an innovative undergraduate programme that prepares students for their professional careers in: management and administration; editing and publishing; teaching; public relations and advertising; and entertainment and the arts. The Department currently offers the following major: • BA English The programme equips students with theoretical and practical knowledge in English language, literature, and professional communication. Our courses develop students' ability to analyse critically the English language and its use in a variety of genres, modes, and media. Upon completion of the programme, students will have acquired the skills and attitudes essential for successful communication in linguistically and culturally diverse contexts. To achieve academic excellence and to promote whole person development, the major adopts a global perspective that emphasises the importance of intercultural knowledge and understanding. All students are encouraged to participate in overseas learning experiences to improve their awareness of intercultural communication and enhance their English communication skills. In addition, internships provide students with valuable experience and skills within professional, academic, and creative contexts. All students will choose to do either a Research Final Year Project or a Professional English Final Year Project as the capstone experience of their university education.
Remarks	BA English is a qualification recognised for exemption from the Language Proficiency Requirement (LPR) (English Language). For details, please visit EDB website. BA English (Language and Literature stream) is listed as one of the Recognised English Major Degree Programmes for the Scholarship for Prospective English Teachers run by the Education Bureau (EDB). Please refer to the EDB website for details. **Useful Links:** *Useful Information for JUPAS Applicants* *Assessment of Applications* *Interview Arrangements* *Flexible Admission Arrangement for JUPAS Applicants* *Special Consideration for JUPAS Applicants* *CityUHK Scholarships for Hong Kong Talents* *CityUHK Tiger Programme* *JUPAS Admissions Score Reference*

Programme Full Name	Media and Communication (Majors: BA Digital Television and Broadcasting / BA Media and Communication) 媒體與傳播 [主修: 文學士(數碼電視與廣播) / 文學士(媒體與傳播)]
Programme Short Name	COM
Short Description	Housed in the landmark Run Run Shaw Creative Media Centre, the Department of Media and Communication offers innovative academic programmes that focus on media convergence. Unlike traditional curricula that segregate different modes of mass communication, we aim to train professional communicators capable of working in an environment of media convergence and information integration – an environment that spans journalism, broadcasting and TV, advertising, public relations and new media. To that end, we integrate new technologies, media skills, communication theories and creativity in our education. The Department's teaching and research activities are supported by a state-of-the-art integrated and inter-compatible digital multimedia platform. Our facilities include digital TV shooting/editing studios, 3D virtual TV/audio recording studios, advertising shooting/design studios, and new media and eye-tracking laboratories. During their undergraduate studies, our students have many opportunities to travel abroad on study trips, participate in student exchanges and engage in overseas internships. Our graduates are rapidly employed after graduation and enter a wide range of professions and careers, such as media industries, telecommunications, advertising/public relations, and business and education. The Department currently offers the following two majors: • BA Digital Television and Broadcasting • BA Media and Communication **Admission Arrangements** JUPAS applicants will be considered for admission to first-year studies at the Department of Media and Communication. Students will enter a major (current major options: Digital Television and Broadcasting; Media and Communication) after one year of study. The top 40% of students# will have a free choice of majors offered by the Department. The other 60% of students will be allocated a major within the Department, subject to the availability of places and the selection criteria set by individual majors. *# based on CGPA with no failed grades and completion of at least 30 credit units including College/Department required courses*

JUPAS Catalogue No.	JS1109
Programme Full Name	BA Linguistics and Language Applications (Features: General Linguistics / Computational Linguistics / Corpus Linguistics / Experimental Linguistics / Language Technology and Applications) 文學士(語言學及語言應用) (特點: 普通語言學 / 計算語言學 / 語料庫語言學 / 實驗語言學 / 語言技術及應用)
Programme Short Name	BALLA
Short Description	This major aims to educate students so that they will become language professionals who are familiar with linguistics and language-related applications. Students will also develop an analytical, critical and creative mind and an open attitude towards people from different cultures. This major provides students with a solid foundation in the scientific study of human language. Students will be prepared for careers that require language expertise and language-related computing skills. In addition to opportunities in advanced studies, graduates will have employment prospects in education and research, as well as in administrative and executive positions in various public and private sectors. They will have an important role to play in language and information service sectors of Hong Kong, Greater China, and world-wide. Moreover, this major is recognized by the Education Bureau as an English language major degree for the purpose of teaching in Hong Kong. There are two main subject areas: Linguistics and Language Applications. • **Core courses in Linguistics** include: Fundamentals of Linguistics, Introduction to Linguistic Research, Language in Society, Language and Mind, Phonetics, Phonology, Morphology and Syntax, and Semantics and Pragmatics. • **Core courses in Language Applications** include: Introduction to Language Technology, Computational Linguistics, and Project I. At a more advanced level, students may choose from among courses such as Computational Lexicography, Computer-Assisted Language Learning, Conversation Analysis, Corpus Linguistics, Experimental Phonetics, First/Second Language Acquisition, Psycholinguistics, Sociolinguistics, and Project II. Participating in the **internships and other co-curricular activities** offered provides valuable job experience in fields that require knowledge of languages, linguistics, and language applications. **Exchange programmes** provide students with opportunities to gain experience of studying and living abroad for a semester, by paying the local tuition fees. The Department of Linguistics and Translation (LT) also offers **two Joint Bachelor's Degree Programmes with National Taiwan University and Columbia University**. Students can get 2 degrees by studying two years in LT and two years at a partner university. For detailed information, please visit https://lt.cityu.edu.hk/programmes-courses/cityu-talents-programme-hk-tech-tiger/joint-bachelors-degree-programmes. **Direct Admission to Joint Bachelor's Degree Program with Columbia University** Starting in 2026/27, JUPAS applicants can directly apply for Year 1 entry to the prestigious Joint Bachelor's Degree Program offered by CityUHK and Columbia University. Graduates will earn degrees from both institutions. A separate application to Columbia University is required after submitting the JUPAS application.

Students may also opt for double majors within CityUHK and major plus minor programme or CityUHK Talents Programme (HK TECH Tiger) https://lt.cityu.edu.hk/programmes-courses/cityu-talents-programme-hk-tech-tiger).

Programme Full Name BSocSc Crime Science (Features: Crime Prevention / Security Practice / Global Policing / Crime Analytics / Cyber and Future Crimes)
社會科學學士 (犯罪科學) (特點: 犯罪預防 / 安保實務 / 全球警政 / 犯罪分析 / 科網與未來犯罪)

Programme Short Name BSocScCRS

Short Description

The Department of Social and Behavioural Sciences prides itself on a long track record in offering quality learning in academic programmes delivered by a multi-disciplinary team of brilliant and committed scholars who bring real world experience into the learning environment. The mission of the Department is to provide quality learning and professional training in the disciplines of Applied Sociology, Counselling, Crime Science, Psychology, and Social Work, excel in related research areas, and promote the betterment of life. Our faculty and students strive to undertake research that leads to technological, economic and social impact. This research translates into a learning centric environment that promotes inspirational learning, interactive learning and innovative learning.

Crime Science is an interdisciplinary approach for developing practical solutions to real world crime problems. This programme aims to equip students with a comprehensive understanding of this approach, including the use of scientific theories, methods and strategies for preventing crime. With a specific focus on safeguarding the public and upholding Hong Kong's reputation as one of the safest cities globally, this programme offers students the opportunity to contribute to societal progress through innovative approaches. The programme considers the prevention of many forms of both small-scale and transnational organised criminal activity – ranging from residential burglaries to cybercrime. It is ideally suited for practical-minded students with a passion for discovery and a commitment to utilizing scientific analytical methods to benefit society and promote social development.

This is the only UGC-funded undergraduate programme in Hong Kong to provide comprehensive training in the discipline of Crime Science.

Short Description	The Department of Social and Behavioural Sciences prides itself on a long track record in offering quality learning in academic programmes delivered by a multi-disciplinary team of brilliant and committed scholars who bring real world experience into the learning environment. The mission of the Department is to provide quality learning and professional training in the disciplines of Applied Sociology, Counselling, Crime Science, Psychology, and Social Work, excel in related research areas, and promote the betterment of life. Our faculty and students strive to undertake research that leads to technological, economic and social impact. This research translates into a learning centric environment that promotes inspirational learning, interactive learning and innovative learning. **Psychology** is a scientific study of thoughts, feelings, and behaviors. Students are provided with comprehensive education in major fields of psychology, including biological, clinical, cognitive, developmental, educational, health, personality, and social psychology. They are also offered opportunities to design and conduct psychological research. **Why BSocSc Psychology?** The Psychology major provides students with comprehensive training in psychology with an emphasis on experimental and research competencies, and prepares students for professional development in human service careers and advanced training in professional psychology and related fields. Our programme provides: • Strong theoretical & scientific training in psychological studies to equip all graduates with essential skills and knowledge to conduct research and to apply learning to daily life • Individual research project in the final year to work with a faculty • Lab-based training in eye-tracking system, EEG system, tDCS and TMS system • Opportunities to work on empirical research under academic staff (e.g., voluntary research schemes) • Options for students to declare either stream of specialization in Health & Development or Mind & Brain **After graduation, students are eligible:** • To apply for graduate membership of professional associations in Hong Kong Psychological Society (HKPS), British Psychological Society (BPS), and American Psychological Association (APA) • To pursue advanced training in Master's or Doctoral level degrees in research & applied psychology, Clinical Psychology, Educational Psychology, Counselling Psychology, and Industrial & Organizational Psychology in local and oversea universities. **Start Your Career Here** Our graduates are particularly suited for people-oriented jobs, such as human resources, public relations, customer services, children and youth services, education and training, counselling and guidance, health-related services, family and community work, etc. Students are also well-prepared for jobs that require

strong research skills and competence, critical analysis and communication abilities, such as scientific or applied research, research and development, project management and so on. Students who aspire to practice as professional psychologists will be able to pursue advanced education at the Master's or doctoral level in Hong Kong or overseas with training in pursuing scientific research or applied psychological training such as health, forensic, clinical, educational, counselling and occupational psychology.

Professional Recognition

Graduates who satisfy the requirements stipulated by the Hong Kong Psychological Society (HKPS) can apply for Graduate Membership of the Society (Note: Graduate Membership of the HKPS is normally regarded as an entrance requirement for advanced training in professional psychology).

Joint Bachelor's Degree Programme

BSocSc Psychology students are also eligible to apply for the Joint Bachelor's Degree Program between City University of Hong Kong and Columbia University. Students study at CityUHK in year 1 and 2, and at Columbia University, New York, USA in year 3 and 4. Two bachelor's degrees will be awarded, one awarded by CityUHK and one awarded by Columbia University.

Direct Admission to Joint Bachelor's Degree Program with Columbia University

Starting in 2026/27, JUPAS applicants can directly apply for Year 1 entry to the prestigious Joint Bachelor's Degree Program offered by CityUHK and Columbia University. Graduates will earn degrees from both institutions. A separate application to Columbia University is required after submitting the JUPAS application.

Programme Full Name	Social and Arts Global Excellence (SAGE) [Features: Any major in the College of Liberal Arts and Social Sciences (except for BSocSc Social Work) / Non-local experience / Interdisciplinary]* 卓越全球人文社科課程 [特點: 自由選擇學院內任何一個主修科(社會科學學士(社會工作)除外) / 海外體驗 / 跨領域學習]
Programme Short Name	SAGE
Short Description	This Social and Arts Global Excellence (SAGE stream) aims to recruit high-calibre applicants who want to explore their academic interests and make informed decisions about their future. Distinguished features of the stream are as follows: a. **Free choice of major:** Students admitted through the SAGE stream are free to choose a major in the College of Liberal Arts and Social Sciences (CLASS) at the beginning of Year 1 (except for BSocSc Social Work). b. **Service-Learning courses:** Students of the SAGE stream are required to satisfactorily complete two Service Learning courses under the SAGE stream, namely PIA2268 Cross-Sectoral Innovation and Leadership (3 credit units) and SS2300 Leading Public and Social Sector Organizations: Service Learning in Practice (3 credit units), which integrate community service with academic learning. This hands-on experience not only enriches students' education but also enhances their understanding of societal issues, fostering personal growth and civic responsibility. c. **Cross-sectoral modules:** Students of the SAGE stream will be given the opportunity to widen their horizons by attending different modules of seminars (non-credit bearing) conducted by experts in their respective industries. d. **Non-local academic/research exchanges:** Upon fulfilling conditions, eligible students of the SAGE stream will be provided with an opportunity to participate in non-local academic/research exchanges in top-ranked universities or prestigious organisations to leverage the diverse disciplines within CLASS. e. **One-to-one mentorship:** Each student will be paired with a faculty member to meet regularly for academic advising and career planning. **Flagship Programme** This is one of the CityUHK's Flagship Programmes, which equip students with essential knowledge and skills, cultivate their global leadership abilities, and connect them with leading professionals. The Flagship Scholarships, which cover tuition and hall fees, a guaranteed berth, and a one-off exchange sponsorship of up to HK$500,000, will be awarded to local JUPAS talents who meet the criteria.

General Entrance Requirements

Core Subjects	Minimum Level
CHINESE LANGUAGE	3
CITIZENSHIP AND SOCIAL DEVELOPMENT	Attained
ENGLISH LANGUAGE	3
MATHEMATICS COMPULSORY PART	2

Elective Subject(s)	Minimum Level
ANY 2 SUBJECTS	3

Notes:

- Liberal Studies would be used as the alternative of the core subject requirement of Citizenship and Social Development.
- Unspecified electives may include Category A elective subjects, Mathematics extended modules (M1/M2) (except for JS1801) and Category C other languages subjects (Japanese: Level N3 or above; Korean: Grade 3 or above; French/German/Spanish: Level A2 or above; Urdu: Grade E or above) (except for JS1200, JS1201, JS1217, JS1300, JS1801, JS1805, JS1806 and JS1807). If students take both M1 and M2, they are counted as one subject only.
- Applied Learning (ApL) subjects are not counted as elective subjects, except for JS1040, JS1041, JS1042, JS1043, JS1044, JS1300, JS1805, JS1806 and JS1807.
- Please refer to the minimum entrance requirements webpage for details.
- Applicants who are marginally failed to meet the entrance requirements of the programme may still have opportunity of admission. CityUHK will continue the flexibility towards the minimum entrance requirements for JUPAS applicants in 2027/28 entry. The details of flexible admission arrangement can be found in CityUHK undergraduate admissions website.

JUPAS Catalogue No. JS1123

Programme Full Name BSocSc Crime Science and Bachelor of Laws (Double Degree)
社會科學學士(犯罪科學)與法律學學士 (雙學位)

Programme Short Name BSocScCRS&LLB

Short Description

The double degree programme between the Department of Social and Behavioural Sciences in the College of Liberal Arts and Social Sciences and the School of Law aims to equip degree-level graduates with broad knowledge of crime science and laws; and analytical competence to conduct scientific and legal research to develop practical and ethical ways to reduce crime and increase security in society.

In particular with respect to the Law degree the major aims to:

- provide a liberal education in the theory and practice of law at the level and rigour appropriate for an undergraduate degree;
- equip students with a critical understanding of law and legal institutions so as to enable them to serve the needs of Hong Kong and the international community; and
- facilitate the development of a range of intellectual skills, in particular the ability to think analytically and critically, to solve problems, and to communicate effectively both orally and in writing.

Programme Full Name	Architecture and Civil Engineering (Majors: BEng Building Services Engineering / BEng Civil Engineering / BSc Architecture and Surveying) 建築學及土木工程學 [主修:工學士(屋宇裝備工程) / 工學士(土木工程) / 理學士(建築學及測量學)]
Programme Short Name	ARCE
Short Description	The Department of Architecture and Civil Engineering (ACE), one of the founding departments at the City University of Hong Kong, offers professional education at both undergraduate and postgraduate degree levels. Our programmes are academically rigorous and professionally focused. Adopting an inter-disciplinary approach, our programmes are delivered by a professional team that includes civil and structural engineers, architectural / building services engineers, construction engineers, material technologists, environmental scientists, architects, urban planners, building surveyors and quantity surveyors. Our graduates are therefore uniquely placed to serve the architecture, engineering and construction (AEC) industry. The AEC industry in Hong Kong is flourishing. Infrastructure and building developments, and the maintenance and refurbishment of existing facilities, have contributed to Hong Kong's growing economy. There are notable opportunities for innovations and career development. In addition to the Hong Kong market, the local AEC industry can expect to participate actively in the markets of the People's Republic of China. The Department has established close collaborations with universities and professional bodies both locally and internationally. This programme aims to provide students a multi-disciplinary knowledge and skills in the area of architectural engineering, civil engineering, architecture and surveying. The programme features a flexible structure with the following majors: • Bachelor of Building Services Engineering • Bachelor of Engineering in Civil Engineering [1] • Bachelor of Science in Architecture and Surveying [2] **Admission Arrangements** Students admitted into the programme will study a common curriculum for the first year and pursue a major (Architectural Engineering, Civil Engineering or Architecture and Surveying) in the second year. The top 40% of students[#] will have a free choice of majors while the remaining 60% will be allocated a major within the Department, subject to the availability of places and the selection criteria set by individual majors. *[1] Students whose major is Civil Engineering can opt for the Structural Engineering stream or Infrastructure and Smart City stream in the second year according to the selection criteria set by the programme team. Students whose major in Civil Engineering with stream in Structural Engineering are eligible to apply for the* Joint Bachelor's Degree Programme between City University of Hong Kong and National Taiwan University. *[2] Students whose major is Architecture and Surveying can opt for the Architecture stream or Surveying and Urban Informatics stream in the second year according to the selection criteria set by the programme team.* *# based on CGPA with no failed grades and completion of at least 30 credit units*

including College/Department required courses

Programme Full Name BSc Chemistry (Streams: Comprehensive Chemistry / Cosmetic Chemistry / Forensic Chemistry / Global Research Enrichment and Technopreneurship (GREAT))
理學士(化學) (專修: 綜合化學 / 化妝品化學 / 鑑證化學 / 環球精研與科創)

Programme Short Name BScCHEM

Short Description

The Department of Chemistry offers one undergraduate major, BSc in Chemistry. This major focuses on the application of knowledge, enabling students to understand important scientific issues, current technologies and the future challenges facing Hong Kong, its immediate region and the world.

The major aims to provide students with a firm foundation in chemical sciences with a focus on analytical chemistry, environmental chemistry, inorganic chemistry, organic chemistry and physical chemistry. It is designed to train and produce graduates who are able to pursue a developing career in local and regional industrial, commercial, government, education, and research sectors.

Four stream options for students to choose from:

- Comprehensive Chemistry (accredited by the Royal Society of Chemistry (RSC))
- Cosmetic Chemistry
- Forensic Chemistry
- Global Research Enrichment and Technopreneurship (GREAT)

Talented students can select one of the programmes to complete two degrees with an accelerated pace:

- Undergraduate plus Taught Postgraduate Degree Programme; or
- Joint Bachelor's Degree Programme with the University of Manchester

JUPAS Catalogue No.	JS1204
Programme Full Name	BSc Computer Science (Streams: Artificial Intelligence / Cybersecurity / Data Science / Multimedia Computing / Software Engineering and Project Management) 理學士(計算機科學) (專修: 人工智能 / 網絡安全 / 數據科學 / 多媒體計算 / 軟件工程與項目管理)
Programme Short Name	BScCSC
Short Description	The Department of Computer Science was established in 1984, and has evolved from a teaching-oriented department into one that excels in both teaching and research. The Department launched its first BSc in Computer Studies in 1987 (renamed and restructured as the BSc in Computer Science in 2000), followed by the MSc in Computer Science in 1991. The Department produced its first PhD graduate in 1994. In addition to offering traditional courses such as the foundations of computer science, computer architecture and software engineering, our curriculum exposes students to the latest advances in cloud computing, data science, machine learning and bioinformatics. Students have the opportunity to undertake a major design and development project in an area such as data science, virtual reality, multimedia, computer vision, cloud computing and information security. All teaching within the Department is subject to stringent quality assurance procedures. The Department maintains state-of-the-art computing facilities, including a private cloud infrastructure to support teaching activities and a high-throughput computing cluster for computationally intensive tasks involved in various research activities. The Department's research foci include bioinformatics, cloud computing, data science, evolutionary computation and metaheuristics, information security, machine learning, mobile computing, multimedia computing, software engineering, computer vision and graphics. Our staff members have contributed intellectually and professionally to the advancement of these fields. The Department currently offers the following majors: • BSc Computer Science • BSc Cybersecurity HKDSE students will be considered for direct admission to the BSc in Computer Science programme offered by the Department of Computer Science. This is one of the leading Computer Science programmes in Hong Kong, providing students with a well-balanced curriculum and solid education in both the theoretical and practical aspects of computing. This foundation enables students to lead successful careers as professional software developers, system architects, system analysts and technology officers. Besides acquiring a broad knowledge of Computer Science, students may elect to specialise in various technology streams such as artificial intelligence, cybersecurity, multimedia, software engineering/project management and data science. In addition, our one-year Information Technology Professional Placement provides students with the opportunity to put their learning and skills into practice and to gain valuable real-world work experience, thus giving them a head start in their careers. BSc Computer Science students are eligible to apply for the following joint degree programme: • Joint Bachelor's Degree Program between City University of Hong Kong and Columbia University For more information, please visit the Department of Computer Science. **Direct Admission to Joint Bachelor's Degree Program with Columbia University**

Starting in 2026/27, JUPAS applicants can directly apply for Year 1 entry to the prestigious Joint Bachelor's Degree Program offered by CityUHK and Columbia University. Graduates will earn degrees from both institutions. A separate application to Columbia University is required after submitting the JUPAS application.

General Entrance Requirements

Core Subjects	Minimum Level
CHINESE LANGUAGE	3
CITIZENSHIP AND SOCIAL DEVELOPMENT	Attained
ENGLISH LANGUAGE	3
MATHEMATICS COMPULSORY PART	2

Elective Subject(s)	Minimum Level
ANY 2 SUBJECTS	3

Notes:

- Liberal Studies would be used as the alternative of the core subject requirement of Citizenship and Social Development.
- Unspecified electives may include Category A elective subjects, Mathematics extended modules (M1/M2) (except for JS1801) and Category C other languages subjects (Japanese: Level N3 or above; Korean: Grade 3 or above; French/German/Spanish: Level A2 or above; Urdu: Grade E or above) (except for JS1200, JS1201, JS1217, JS1300, JS1801, JS1805, JS1806 and JS1807). If students take both M1 and M2, they are counted as one subject only.
- Applied Learning (ApL) subjects are not counted as elective subjects, except for JS1040, JS1041, JS1042, JS1043, JS1044, JS1300, JS1805, JS1806 and JS1807.
- Please refer to the minimum entrance requirements webpage for details.
- Applicants who are marginally failed to meet the entrance requirements of the programme may still have opportunity of admission. CityUHK will continue the flexibility towards the minimum entrance requirements for JUPAS applicants in 2027/28 entry. The details of flexible admission arrangement can be found in CityUHK undergraduate admissions website.

Remarks:

Programme Full Name	Electrical Engineering (Majors: BEng Computer and Data Engineering / BEng Electronic and Electrical Engineering / BEng Information Engineering / BEng Microelectronics Engineering) 電機工程學 [主修: 工學士(電子計算機及數據工程學) / 工學士(電子及電機工程學) / 工學士(資訊工程學) / 工學士(微電子工程學)]
Programme Short Name	ELEL
Short Description	In today's interconnected world, technology is at the heart of how we live, work, and play. Whether you're streaming your favorite show, navigating with GPS, chatting with friends across continents, or using AI-powered applications, electrical engineering is the driving force behind it all. From wired and wireless communication to cutting-edge innovations like artificial intelligence, renewable energy, and autonomous vehicles, electrical engineers are shaping the technologies that connect and improve our lives. The Department of Electrical Engineering offers dynamic and future-ready programmes that equip students with the knowledge and skills to thrive in a fast-evolving, technology-driven world. Our majors are designed to ensure seamless functionality of technologies across continents, empowering students to contribute to transformative advancements in areas such as AI, robotics, circuit design, the Internet of Things (IoT), and 5G communications. Whether you aspire to design revolutionary hardware, develop intelligent systems, or create groundbreaking software, our programs provide the expertise you need to succeed. We offer **four specialized majors** that provide depth for mastering core technologies while offering the flexibility to explore diverse career paths. The first two years of study feature a common curriculum that builds a strong foundation in essential areas such as: • **Mathematics and Physics**: The building blocks of engineering problem-solving. • **Electronics and Circuits**: Understanding the principles behind modern devices. • **Computer Programming**: Developing the skills to design software and systems. • **Information Technology**: Exploring the technologies driving our digital world. This foundational training prepares students for advanced courses in their third and final years, where they can specialize and apply their knowledge to real-world challenges. The Department offers the following majors: • BEng Computer and Data Engineering • BEng Electronic and Electrical Engineering • BEng Information Engineering • BEng Microelectronics Engineering Our strong partnerships with industry leaders ensure that our programmes remain relevant and practical, addressing the needs of Hong Kong and beyond. Through internships, collaborative projects, and exposure to cutting-edge technologies, students gain valuable hands-on experience and insights into the latest innovations. These connections not only enhance learning but also open pathways to exciting careers in fields like AI, smart cities, renewable energy, financial technology (FinTech), and telecommunications. **Admission Arrangements**

JUPAS applicants will apply for admission to first-year studies in the Department of Electrical Engineering. Students will enter a major (major options: Computer and Data Engineering; Electronic and Electrical Engineering; Information Engineering; Microelectronics Engineering) after one year of study. The top 40% of students# will have a free choice of majors offered by the Department. The other 60% of students will be allocated a major within the Department, subject to the availability of places and the selection criteria set by individual majors.

 # based on CGPA with no failed grades and completion of at least 30 credit units including College/Department required courses

Programme Short Name	BScCM
Short Description	The Bachelor of Science in Computing Mathematics programme was introduced in 1994. This major is unique in Hong Kong. It emphasizes the balance between theories and their applications to practical problems, with a special focus on applied mathematics linked to computational aspects. The major aim at equipping students and producing graduates with a strong background in data analysis, mathematical modelling, scientific computing and technical computer software. Students are trained to think quantitatively and analyse problems critically. Our graduates contribute to the commercial, financial and industrial sectors in Hong Kong and throughout Greater China. The programme focuses on linking the applied areas of mathematics and computing. BSc Computing Mathematics students are eligible to apply for the following joint degree programmes: Joint Bachelor's Degree Program between City University of Hong Kong and Columbia University Joint Bachelor's Degree Programme between City University of Hong Kong and The University of Edinburgh **Direct Admission to Joint Bachelor's Degree Program with Columbia University** Starting in 2026/27, JUPAS applicants can directly apply for Year 1 entry to the prestigious Joint Bachelor's Degree Program offered by CityUHK and Columbia University. Programme Short Name	M.E.
Short Description	Mechanical Engineering is a highly popular degree programme that offers students a wide range of career opportunities. At City University of Hong Kong, we provide a comprehensive Mechanical Engineering programme designed to equip you with the essential skills and knowledge necessary to excel in any technology-related field. Our programme includes three majors, Aerospace Engineering, Mechanical Engineering, and Nuclear and Risk Engineering, offering students a range of options based on their interests. With an almost 100% employment rate, a degree in Mechanical Engineering from City University of Hong Kong ensures you a promising future with excellent job opportunities. Join us today and embark on your journey towards a successful career in Mechanical Engineering. Taught by over 30 academic staff members, the Department currently offers the following majors: • BEng Aerospace Engineering • BEng Mechanical Engineering • BEng Nuclear and Risk Engineering Please refer to the Department's website for more information about the Department. **Admission Arrangements** JUPAS applicants will be considered for admission to first-year studies at the Department of Mechanical Engineering. General Entrance Requirements

Core Subjects	Minimum Level
CHINESE LANGUAGE	3
CITIZENSHIP AND SOCIAL DEVELOPMENT	Attained
ENGLISH LANGUAGE	3
MATHEMATICS COMPULSORY PART	2

Elective Subject(s)	Minimum Level
ANY 2 SUBJECTS	3

Notes:

- Liberal Studies would be used as the alternative of the core subject requirement of Citizenship and Social Development.
- Unspecified electives may include Category A elective subjects, Mathematics extended modules (M1/M2) (except for JS1801) and Category C other languages subjects (Japanese: Level N3 or above; Korean: Grade 3 or above; French/German/Spanish: Level A2 or above; Urdu: Grade E or above) (except for JS1200, JS1201, JS1217, JS1300, JS1801, JS1805, JS1806 and JS1807). If students take both M1 and M2, they are counted as one subject only.
- Applied Learning (ApL) subjects are not counted as elective subjects, except for JS1040, JS1041, JS1042, JS1043, JS1044, JS1300, JS1805, JS1806 and JS1807.
- Please refer to the minimum entrance requirements webpage for details.
- Applicants who are marginally failed to meet the entrance requirements of the programme may still have opportunity of admission. CityUHK will continue the flexibility towards the minimum entrance requirements for JUPAS applicants in 2027/28 entry. The details of flexible admission arrangement can be found in CityUHK undergraduate admissions website.

Remarks:

- For details of the alternative Chinese Language qualifications acceptable by the University for Non-Chinese Speaking (NCS) students, please click here.

Calculation of scores for applicants with more than 1 sitting in HKDSE Examination

CityUHK accepts repeat results and will use the best results in assessing whether applicants fulfil the entrance requirements and to calculate admission scores.

Programme Full Name BSc Physics [Features: Classical Physics/Modern Physics/Experimental and Computational Physics/Medical Physics/Condensed Matter Physics/Global Research Enrichment and Technopreneurship (GREAT)]
理學士 (物理學) (特點：經典物理 / 近代物理 / 實驗與電算物理 / 醫學物理 / 凝聚態物理 / 環球精研與科創)

Programme Short Name BScPHY

Short Description

The BSc Physics programme covers fundamental topics in physics and specialised topics such as financial engineering, biophysics, medical physics, material science/solid-state physics, and optics, leading to diverse career paths in medical and healthcare, engineering, education, commercial and industrial sectors. Graduates also have the opportunity to pursue postgraduate studies. In addition, students may take part in the **research attachment scheme**, which provides them with early exposure to discovery and innovation.

BSc Physics students are eligible to apply for the following degree programme options under the Talents Programme:

- Joint Bachelor's Degree Program between City University of Hong Kong and Columbia University
- Undergraduate plus Master's Degree Programme (BSc Physics + MSc Physics with Data Modelling and Quantum Technologies)

Direct Admission to Joint Bachelor's Degree Program with Columbia University

Starting in 2026/27, JUPAS applicants can directly apply for Year 1 entry to the prestigious Joint Bachelor's Degree Program offered by CityUHK and Columbia University. Graduates will earn degrees from both institutions. A separate application to Columbia University is required after submitting the JUPAS application.

Programme Short Name	BEngMASE
Short Description	Being the first of its kind in Hong Kong, the Department of Materials Science and Engineering is established to develop internationally competitive and leading-edge research and provide a professional education curriculum that equips graduates to contribute to Hong Kong, Greater China, and the whole world in materials science and engineering and related sectors. The Department serves as a collaboration platform for developing cross-disciplinary academic programmes and interdisciplinary research projects with other academic units in the University. Further, it is the world-leading department in research and professional education with a focus on four targeted areas, namely - 1. Computational Materials Science & AI for Materials Science 2. Functional Materials 3. Structural Materials 4. Materials characterization techniques The Department also serves as an international platform to encourage collaboration among the leading institutes in the world and to enhance our global research reputation. **BEng Materials Science and Engineering** In the Materials Science and Engineering major, students acquire knowledge that can be used to solve materials problems in engineering processes. Graduates of this major can seek jobs in engineering companies and join the Hong Kong Institution of Engineers as graduate members. They can become professional engineers after receiving the relevant on-the-job training and completing the professional assessment. BEng Materials Science and Engineering students are eligible to apply for the following joint degree programme: Joint Bachelor's Degree Programme between City University of Hong Kong and National Taiwan University

工學士(生物醫學工程) (特點: 醫療技術 / 生物儀器 / 細胞和組織工程 / 醫療機器人)

Programme Short Name BEngBME

Short Description

The Department of Biomedical Engineering (BME) aims to provide world-class education and to conduct research in emerging fields of engineering. To achieve these aims, the Department adopts an interdisciplinary approach and includes subject areas that ensure our graduates are equipped to meet Hong Kong's current and future needs. The Department ranked 40th in the world in the subject of biomedical engineering in the Academic Ranking of World Universities in 2025.

The Department currently offers a major in Biomedical Engineering. The Department's faculty members have interdisciplinary backgrounds with academic strengths in areas including BioMEMS, Bioimaging, Flexible Bioelectronics, Biomedical Robotics, and Nanomedicine / Biomaterials.

Please refer to the Department's website for more information about the BME Department.

Programme Full Name	Pathway for Research, Innovation, and Multinational Engineering (PRIME) (Free Choice of Major in College of Engineering + Overseas Experience / Interdisciplinary / Engineering Entrepreneurship) 研究、創新和環球工程課程 (特點: 自由選擇工學院任何主修 十 海外經驗 / 跨學科 / 工程創業)
Programme Short Name	PRIME

Short Description

Pathway for Research, Innovation, and Multinational Engineering (PRIME) is the Flagship Programme of the College of Engineering designed to provide exceptional students with a comprehensive education in engineering and opportunities to gain valuable experience through research internships and work placements at leading universities and companies worldwide. It equips students with the skills and knowledge needed to excel in the field of engineering profession, preparing them for successful careers in the global industry. PRIME welcomes talented and motivated students with a passion for engineering and a commitment to excellence.

Key features

Free Choice of Major: Students admitted to PRIME are free to choose any major within the College of Engineering upon accepting the offer. They will be enrolled in one of the departments before starting their first year of study.

Overseas Experience in Year 3 or Year 4

1. Research Internship: Selected students will have the opportunity to work with leading researchers at top overseas universities. This will provide students with hands-on experience in cutting-edge research and will help them develop essential skills in data analysis, experimental design, and scientific communication.
2. Global Work Placement: Selected students may also have the opportunity to undertake placements with international companies in leading engineering and technology destinations around the world. These experiences enable students to apply their engineering skills in real-world settings, build global professional networks, strengthen communication skills, and gain invaluable industry exposure.

Interdisciplinary Final-year Project: Leveraging faculty members' diverse research expertise and state-of-the-art research facilities, students will receive support to conduct interdisciplinary research in their final-year projects, offering valuable experience for their future professional endeavours.

Mentorship: Each student will be paired with a faculty member who will provide personalised guidance and support throughout the programme. The faculty mentor will help the student identify their academic and professional goals, develop a plan to achieve them, and provide feedback and guidance along the way.

Guaranteed admission to CityUHK PhD programme: This opportunity provides a clear pathway for students interested in furthering their academic and research careers. (Upon meeting the entrance requirements for the CityUHK PhD programme when the student graduates from PRIME.)

Other features

With the mission to foster the career development of students and promote impactful innovations, students of the College of Engineering will also benefit from the following optional schemes.

Undergraduate plus Master's Degree Programmes: Students in an *"Undergraduate plus Master's Degree Programme"* will receive a conditional offer for a Master's degree programme when they join CityUHK as undergraduate students. They can benefit from advanced-level courses, such as those with research elements and normally taught at the Master's level, during their undergraduate study. On completion of their study at CityUHK, students will be awarded two degrees (Bachelor's degree + Master's degree).

Entrepreneurial Development: The College offers a Minor in Engineering Entrepreneurship, designed to help students develop the skills and knowledge needed to start and operate their engineering businesses. It also helps students broaden their multi-disciplinary perspectives, integrating management, marketing, finance, and engineering.

Cross-Cultural Competence: Through Student Exchange Programmes, study tours and the Cultural & Language Immersion Scheme (CALIS), students are provided with opportunities to develop cross-cultural competence through activities such as language training, cultural immersion experiences, or international service projects. This would help students to become global citizens and to develop the skills needed to work effectively in diverse and multicultural environments.

Flagship Programme

This is one of the CityUHK's Flagship Programmes, which equip students with essential knowledge and skills, cultivate their global leadership abilities, and connect them with leading professionals. The Flagship Scholarships, which cover tuition and hall fees, a guaranteed berth, and a one-off exchange sponsorship of up to HK$500,000, will be awarded to local JUPAS talents who meet the criteria.

General Entrance Requirements

Core Subjects	Minimum Level
CHINESE LANGUAGE	3
CITIZENSHIP AND SOCIAL DEVELOPMENT	Attained
ENGLISH LANGUAGE	3
MATHEMATICS COMPULSORY PART	2

Elective Subject(s)	Minimum Level
ANY 2 SUBJECTS	3

Notes:

- Liberal Studies would be used as the alternative of the core subject

requirement of Citizenship and Social Development.

- Unspecified electives may include Category A elective subjects, Mathematics extended modules (M1/M2) (except for JS1801) and Category C other languages subjects (Japanese: Level N3 or above; Korean: Grade 3 or above; French/German/Spanish: Level A2 or above; Urdu: Grade E or above) (except for JS1200, JS1201, JS1217, JS1300, JS1801, JS1805, JS1806 and JS1807). If students take both M1 and M2, they are counted as one subject only.
- Applied Learning (ApL) subjects are not counted as elective subjects, except for JS1040, JS1041, JS1042, JS1043, JS1044, JS1300, JS1805, JS1806 and JS1807.
- Please refer to the minimum entrance requirements webpage for details.
- Applicants who are marginally failed to meet the entrance requirements of the programme may still have opportunity of admission. CityUHK will continue the flexibility towards the minimum entrance requirements for JUPAS applicants in 2027/28 entry. The details of flexible admission arrangement can be found in CityUHK undergraduate admissions website.

Remarks:

- For details of the alternative Chinese Language qualifications acceptable by the University for Non-Chinese Speaking (NCS) students, please click here.

Calculation of scores for applicants with more than 1 sitting in HKDSE Examination

CityUHK accepts repeat results and will use the best results in assessing whether applicants fulfil the entrance requirements and to calculate admission scores.

Programme Entrance Requirements

Programme Full Name	BSc Cybersecurity (Features: System Security / Software Security / Cryptography / Privacy-Enhancing Technologies / Cyber Risk Management) 理學士 (網絡安全) (特點: 系統安全 / 軟件安全 / 密碼學 / 隱私增強技術 / 網絡風險管理)
Programme Short Name	BScCYBE
Short Description	The Department of Computer Science was established in 1984, and has evolved from a teaching-oriented department into one that excels in both teaching and research. The Department launched its first BSc in Computer Studies in 1987 (renamed and restructured as the BSc in Computer Science in 2000), followed by the MSc in Computer Science in 1991. The Department produced its first PhD graduate in 1994. In addition to offering traditional courses such as the foundations of computer science, computer architecture and software engineering, our curriculum exposes students to the latest advances in cloud computing, data science, machine learning and bioinformatics. Students have the opportunity to undertake a major design and development project in an area such as data science, virtual reality, multimedia, computer vision, cloud computing and information security. All teaching within the Department is subject to stringent quality assurance procedures. The Department maintains state-of-the-art computing facilities, including a private cloud infrastructure to support teaching activities and a high-throughput computing cluster for computationally intensive tasks involved in various research activities. The Department's research foci include bioinformatics, cloud computing, data science, evolutionary computation and metaheuristics, information security, machine learning, mobile computing, multimedia computing, software engineering, computer vision and graphics. Our staff members have contributed intellectually and professionally to the advancement of these fields. The Department currently offers the following majors: • BSc Computer Science • BSc Cybersecurity The rapid and unprecedented evolution of the digital landscape is being driven by transformative technologies like AI, Big Data, and FinTech, revolutionizing industries across the globe. Nevertheless, these advancements introduce novel vulnerabilities and threats, underscoring the critical imperative for cybersecurity professionals. The pervasive shortage of skilled cybersecurity experts continues to persist within numerous businesses worldwide, resulting in a substantial and escalating demand for qualified cybersecurity professionals.

Programme Full Name	BEng Innovation and Enterprise Engineering (Features: Engineering / Technology / Innovation / Enterprise / Entrepreneurship) 工學士(創新與企業工程) (特點: 工程學 / 科技 / 創新 / 企業 / 創業)
Programme Short Name	BEngIEEG
Short Description	BEng in Innovation and Enterprise Engineering (IEEG) is an unique undergraduate programme in Hong Kong which covers elements of systems design and process, engineering innovation and entrepreneurship. The programme prepares our students for successful careers in engineering innovation and enterprise which are identified as a key component for Hong Kong's future planning and growth. Our curriculum allows students to further specialize in different areas of expertise including industrial Internet-of-Things, smart city, logistics and supply chain, robotics and automation. Our programme also has a placement component that allows students to gain real world experience, which will provide a significant edge when students look for employment after graduation. This programme will cover the following components over the first two-year span: • Understanding of the scientific principles and applications of innovation and enterprise engineering. • A solid foundation in science subjects for the preparation of engineering exploration. • Basic knowledge in relevant areas, including engineering enterprise, logistics and supply chain management, management science, technology innovation, optimisation, statistics and reliability. • Ability to formulate and solve real intelligent system and enterprise engineering problems and provide high-quality solutions. • Work-related experience and effective communication skills. Upon completing the initial two-year period, students have the option to pursue one of the following paths: 1. to complete the remaining required courses of the IEEG, offered by SYE and other departments in the College of Engineering (CENG) and graduate with a Bachelor of Engineering degree in IEEG 2. to select other BEng programmes or obtain double major degrees in the College of Engineering if the student wishes to specialise in other engineering disciplines. There will be an academic advisor mentoring each student in the programme on selecting required elective courses for achieving their goals upon completion of the programme.

Programme Short Name	BScCSC&BScCFFT
Short Description	Bachelor of Science in Computer Science and Bachelor of Science in Computational Finance and Financial Technology aims to educate a new generation of professionals with a unique combination of expertise from the important areas of computer science, computational finance, and financial technology. Finance is one of the pillars supporting the economy of Hong Kong, and the use of computational technologies has become pervasive in different business sectors. With recent significant advances in artificial intelligence (AI) and blockchain technologies and their increasing applications in every aspect of the financial industry, the programme, which comprises a broad set of courses from the Department of Computer Science and College of Business, will train students with a distinctive and interdisciplinary blend of knowledge across the complete spectrum of computer science/computational finance/financial technology areas, from AI, big data analytics, derivatives pricing, financial econometrics, portfolio management to software engineering.

Programme Full Name Integrative Bioscience & Bioengineering Programme (Bio3) (Features: Free Choice of Major / Overseas Research Opportunities / Interdisciplinary)
綜合生物科學與生物工程課程 (特點: 自主選擇主修學科 / 海外頂尖院校研究機會 / 跨學科)

Programme Short Name Bio3

Short Description

Explore, Innovate, and Connect: A Gateway to Biological Sciences, Biomedical Sciences, and Biomedical Engineering

Bio^3 aims to provide exemplary students with a comprehensive and globally-oriented education in biomedicine and biomedical engineering. Building on the strengths of the Biological Sciences (BISI), Biomedical Sciences (BMS), and Biomedical Engineering (BME) programmes, Bio^3 integrates enhanced overseas study experiences, research opportunities, and mentorship support. Students will benefit from the specialized curriculum in biomedicine and biomedical engineering, along with extensive training in global perspectives, innovative mindset, and research.

Flagship Programme

This is one of the CityUHK's Flagship Programmes, which equip students with essential knowledge and skills, cultivate their global leadership abilities, and connect them with leading professionals. The Flagship Scholarships, which cover tuition and hall fees, a guaranteed berth, and a one-off exchange sponsorship of up to HK$500,000, will be awarded to local JUPAS talents who meet the criteria.

General Entrance Requirements

Core Subjects	Minimum Level
CHINESE LANGUAGE	3
CITIZENSHIP AND SOCIAL DEVELOPMENT	Attained
ENGLISH LANGUAGE	3
MATHEMATICS COMPULSORY PART	2

Elective Subject(s)	Minimum Level
ANY 2 SUBJECTS	3

Notes:

- Liberal Studies would be used as the alternative of the core subject requirement of Citizenship and Social Development.

- Unspecified electives may include Category A elective subjects, Mathematics extended modules (M1/M2) (except for JS1801) and Category C other languages subjects (Japanese: Level N3 or above; Korean: Grade 3 or above; French/German/Spanish: Level A2 or above; Urdu: Grade E or above) (except for JS1200, JS1201, JS1217, JS1300, JS1801, JS1805, JS1806 and JS1807). If students take both M1 and M2, they are counted as one subject only.
- Applied Learning (ApL) subjects are not counted as elective subjects, except for JS1040, JS1041, JS1042, JS1043, JS1044, JS1300, JS1805, JS1806 and JS1807.
- Please refer to the minimum entrance requirements webpage for details.
- Applicants who are marginally failed to meet the entrance requirements of the programme may still have opportunity of admission. CityUHK will continue the flexibility towards the minimum entrance requirements for JUPAS applicants in 2027/28 entry. The details of flexible admission arrangement can be found in CityUHK undergraduate admissions website.

Remarks:

- For details of the alternative Chinese Language qualifications acceptable by the University for Non-Chinese Speaking (NCS) students, please click here.

Calculation of scores for applicants with more than 1 sitting in HKDSE Examination

CityUHK accepts repeat results and will use the best results in assessing whether applicants fulfil the entrance requirements and to calculate admission scores.

Programme Entrance Requirements

Core Subjects	Minimum Level
CHINESE LANGUAGE	3
CITIZENSHIP AND SOCIAL DEVELOPMENT	Attained
ENGLISH LANGUAGE	3
MATHEMATICS COMPULSORY PART	3

Elective Subject(s)	Minimum Level
One of the following elective subjects:	
BIOLOGY	3
CHEMISTRY	3
PHYSICS	3
One of the following elective subjects:	
ANY 1 SUBJECT	3

Notes for Elective Subject(s):

- Unspecified elective subjects exclude Category C other language subjects.
- Besides Category A elective subjects, Mathematics extended modules (M1/M2) can also be used to meet the elective requirement. If students take both M1 and M2, they are counted as one subject only.
- “Attained with Distinction II” in the following Applied Learning subject may be accepted as one elective subject for JS1300:
  - Medical Laboratory Science

JUPAS Catalogue No. JS1801

Programme Full Name Bachelor of Veterinary Medicine (Features: One Health / Animal Health & Welfare / Public Health / Dual Accreditation)
獸醫學學士 (特點: 健康一體化 / 動物健康與福利 / 公共衞生 / 雙認證獸醫課程)

Programme Short Name BVM

Short Description

The BVM Programme was internationally accredited by both the Australasian Veterinary Boards Council (AVBC) and the Royal College of Veterinary Surgeons (RCVS). Our BVM Programme is the only programme in Asia to be directly accredited by AVBC and RCVS.

With dual accreditation of our BVM Programme by AVBC and RCVS, our graduates can register to practise in Hong Kong, the United Kingdom, Australia and New Zealand or any other country recognising one of these bodies, without the need to sit further examinations. For further information, please refer to the JCC website.

Flagship Programme

This is one of the CityUHK's Flagship Programmes, which equip students with essential knowledge and skills, cultivate their global leadership abilities, and connect them with leading professionals. The Flagship Scholarships, which cover tuition and hall fees, a guaranteed berth, and a one-off exchange sponsorship of up to HK$500,000, will be awarded to local JUPAS talents who meet the criteria.

Non-Academic Criteria

i) Letter(s) of Accomplishment for work experience with animals:

- 70 hours, approx. 10 days (e.g. in animal shelters, veterinary clinics, zoos, aquariums). Applicants who have successfully completed the applied learning course Animal Care offered by CityUHK SCOPE may apply for the exemption of relevant work experience and animal handling experience.
- Submission Deadlines: mid-July (Details of the submission method will be notified by email in mid-June)

ii) CASPer

- As part of the application process, all applicants are required to complete an online open response situational judgement test (CASPer) prior to the interview step. More information about the CASPer test can be found on our BVM Admission Website.

Notes for Elective Subject(s):

- Unspecified elective subjects exclude Mathematics extended modules (M1/M2) and Category C other languages subjects.

JUPAS Catalogue No.	JS1805
Programme Full Name	Biomedical Sciences (Majors: BSc Biological Sciences / BSc Biomedical Sciences) 生物醫學 [主修: 理學士(生物科學) / 理學士(生物醫學)]
Programme Short Name	BMS
Short Description	The Biological Sciences major aims to nurture students to embark on scientific research, educational, professional or technical career after graduation. We provide a rigorous, broad-spectrum curriculum combined with specialization in major fields of biology such as cancer biology, nanobiotechnology, regenerative medicine, microbiology and neurobiology. The programme presents an in-depth study of biomedical and life sciences, with courses ranging from bioinformatics to biochemistry, genetics, cellular & molecular biology and immunology. With the two tailor-made practical courses as well as opportunities in research rotations and projects, students will gain a thorough understanding of how science is done with advanced technologies including omics & genome editing and state-of-the-art equipment in our research laboratories. It also nurtures students who are interested in pursuing postgraduate research training and undertaking a broad range of science-based careers. The Biomedical Sciences major emphasizes the integration of basic fundamental knowledge in biomedical sciences with investigative skills and state-of-the-art technologies to enable students to understand the causes and diagnoses and treatments of human disorders and diseases. The programme is designed to prepare graduates for employment in medical & diagnostic laboratories, medical device & biotech/pharmaceutical industries and research. Our unique industry-informed curriculum provides students with extensive exposure to medical laboratory technology, modern biotechnology, and medical lab/industrial training opportunities through our strategic partnership with the healthcare and medical laboratory sectors as well as biotech & pharmaceutical industries. **Admission Arrangements** JUPAS applicants will be considered for admission to first-year studies at the Department of Biomedical Sciences. Students will enter a major (current major options: Biological Sciences; Biomedical Sciences) after one year of study. The top 40% of students# will have a free choice of majors offered by the Department. The other 60% of students will be allocated a major within the Department, subject to the availability of places and the selection criteria set by individual majors. *# based on CGPA with no failed grades and completion of at least 30 credit units including College/Department required courses*
